

Anne Arundel County Roofing Company Develops Storm Insurance Claim Process

April 30, 2020

April 30, 2020 -
Glen Burnie, MD - Marriott & Sons Roofing is pleased to announce that the Maryland roofing company has reached a milestone of thirty years in operation, providing its roofing and siding services to customers throughout the Glen Burnie area.

Maryland is prone to severe weather conditions, with intense winds and hail storms being the primary cause of roof damage. Loose and worn shingles can lead to roof leaks, which can then pose a variety of structural integrity issues for both residential and commercial buildings.

To help Glen Burnie, Annapolis, and Anne Arundel County residents and business owners benefit from professional and reliable roofing services according to the latest industry standards, Marriott & Sons Roofing has created a three-step process for claiming roof repairs against homeowners insurance.

The company provides shingle replacement and leak repair for all types of roofs and all degrees of damage.

Working with experienced roofers, the company provides 24/7 emergency services for situations requiring immediate intervention.

The three-step process to a new roof following storm damage begins with having an experienced roofing contractor check your property for damages on the roof, gutters, windows, patio furniture, siding, garage doors, and even interior leaks.

The second part of the process is to have Marriott & Sons Roofing call the claims department to file a new property claim for ice, wind, or tree damage to a shingle roof. Finally, the customer will receive a roofing estimate. Once Marriott & Sons Roofing has a copy of the insurance paperwork, the homeowner can sign a contract, pick a color, and get started with the new shingle roof.

With their newly launched service Marriott & Sons Roofing?s team of experienced roofers are able to assess a home for any repair needs with an inspection visit. In the inspection, they will check the roof and eaves from the interior for any signs of leaks or water damage, as well as skylight seals before moving to an external check for broken shingles, cracked pipes and gutter issues.

More details are available at https://marriottsonsroofing.business.site/posts/8994173037490685054?hl=en.

In a recent interview, Zachary Mathis, owner of the company, explained, "No matter the type of siding on your house, no problem. We have the knowledge and experience to get the job done right. Did you know that installing siding on your home could guarantee your siding to last for up to forty years? Give us a call to get new siding or more information."

"Roofing doesn't need to break the bank when your insurance covers most of the cost," he continued. "Our three-step process is easy and convenient. If you need more than just a residential roof done, we have you covered there, as well. You can call us today for a free and no-obligation estimate. We are focused on unparalleled customer support for each of our projects. "

Marriott & Sons Roofing offers free estimates and consultation, and serves nearly all of Maryland. With years of experience working with virtually all types of roofing materials, and specialties in shingle and metal roofs, it?s easy to understand the long list of satisfied customers. Safety is a main priority for the company as well and full insurance coverage for both workers and home owners is carried at all times. To learn more about Marriott & Sons Roofing, visit the company?s website at https://www.pearltrees.com/marriottsonsroofing or call (410) 824-1032.

The Maryland roofing repair company offers a range of warranties for their work covering options that are only available for certified installers such as themselves. Along with a quick quote system on their website

where customers can get an estimate based on their roof type, their online booking system allows customers to schedule an appointment for an inspection for a repair or assessment with no charge for a complete roof estimate. The company also offers free storm damage assessments for the season.
