Gardendale, AL Hearing Aid Store Introduces ?Video Visits? for Hearing Care via Beltone Remote Care Live

April 27, 2020

April 27, 2020 -

Gardendale, Ala. ? Beltone USA, the nation?s leading hearing care provider, announced that it now offers real-time video hearing care appointments from more than 1,500 Beltone Hearing Centers in North America, reducing the need for in-office visits at a time when older, more vulnerable populations are advised to stay at home. Furthermore, the Gardendale, AL hearing aid store is providing replacement batteries for free by request in the mail.

Beltone Remote Care Live gives hearing care professionals the ability to both consult with patients via video and to remotely make hearing aids adjustments through the Beltone HearMax phone app in real-time.

Recognizing that COVID-19, or coronavirus, is a serious issue for the patient populations typically using hearing aids in Gardendale, AL, telehealth services can be a useful tool for both hearing care professionals and their patients.

?We are fully committed to helping our patients through this difficult time and have accelerated the launch of this service to do exactly that. Remote Care Live becomes even more important as patient access to

in-person hearing care is limited as communities across the country implement various ?stay home? policies to help minimize COVID-19 spread,? says Monte Dillow, president, Beltone.

?We?ve seen the growth of telemedicine in many medical settings, but it has been a recent introduction to hearing care,? Dillow continues. ?With Beltone Remote Care Live, we really take it to a new level, making it easier on our patients and their families to access the hearing care they need.?

For those who are unable or uncomfortable going to an office to purchase them during this unprecedented time, the Beltone Foundation is providing one pack of hearing aid batteries by mail to anyone, regardless of being a Beltone patient. To identify the hearing aids battery size, Beltone advises patients to look at the current battery for the color and number on the battery as zinc-air hearing aid batteries come in color and number coded packages that designate the size of the battery inside. Yellow for Size 10, Brown for Size 312, Orange for Size 13 and Blue for Size 675, and Beltone USA is offering each of these sizes.

Beltone USA continues to follow the guidelines established by the Center for Disease Control (CDC) and is using every precaution recommended in cleaning their facilities and equipment. The health and safety of their patients are as important to them as their commitment to better hearing.
