

# Revitalize You MD Announces Enhanced Range of Medical Services to Help Fight Aging

*April 29, 2020*

April 29, 2020 -

Revitalize You MD, a well-known clinic based in Roswell, Georgia, is proud to announce its enhanced range of anti-aging medical services. All services are tailored to help meet a client?s specific needs and this user-tailored approach is what the company thinks will help its clients fight the ravages of time.

In years gone by aging was viewed as simply something that happens to both men and women as a result of life and that one should accept it gracefully. Of course, aging is a natural part of life, but that does not mean that it has to be accepted and that there is nothing that can be done about it.

Thanks to modern medicine and a better understanding of wellness people have longer life expectancies now than at any time in history and today, more so than ever before, both men and women are making the choice to take steps to look as good as they can for as long as they can.

Revitalize You MD has a range of services that the company considers can help clients do just that and it has

gained an appreciative following as can be seen on its GMB Website testimonials where one satisfied client had this to say, ?Rachael and the entire team here is amazing. They take time to listen to all questions and concerns. They have even answered questions of mine after hours and on weekends multiple times. Every interaction I have had with them has been incredible. Highly recommended.?

The company offers hormone replacement therapy (HRT) for both men and women. Aging and the subsequent hormonal changes associated with it happen to both sexes albeit often at different times and in different ways. For men, the symptoms can include low sex drive, reduced energy levels, lack of mental focus, and even depression. For women, symptoms may include, weight gain, hot flashes, fatigue, and memory issues amongst other things.

Intravenous (IV) therapy may help correct intracellular nutrient deficiencies and it does so by feeding minerals, vitamins, and amino acids directly into the bloodstream. Traditional oral methods do not work as fast as the more efficient method of IV therapy allows. Various IV cocktails are on offer designed to help promote anti-aging, weight loss, immune system boosting, and there is even a hangover cure.

One of the most visible signs of aging is wrinkling but thanks to science there are now options for treatment to help minimize or even eliminate these lines. Botox has received a lot of coverage in the media in recent years and being FDA approved is a popular choice for those wishing to improve crow?s feet, forehead, and frown lines. Juvéderm is another popular choice for many with wrinkles. Juvéderm is a gel-based product that is injected to help replace soft tissue volume that has been lost and is chosen by many to help plump up thinning lips. Like Botox, it can be used to aid the reduction of lines and wrinkles.

As another client testified, ?Dr Lucy does a fantastic job with fillers and Botox. I look younger as my lips are slightly plumper but not overdone, I can still move my brow although we erased forehead, bunny lines and crow?s feet. My friends were all asking did I get new makeup or commenting I looked somehow different or well rested!?

Revitalize You MD?s stated mission is ?To improve the health span of our patients by addressing the chronic conditions associated with the aging process.? Weight loss can be a critical factor in making this happen and the clinic offers a number of customized services that are tailored to an individual?s needs and considers a person?s lifestyle, situation, and health goals.

Those wishing to find out more about Revitalize You MD and the customized anti-aging services it offers can do so by visiting its website or its Instagram Page, where visitors will find an online contact form and other information needed for reaching out to the company.
