

Covid Cleanse For Cars Now Available At Safe Care Ambulance

May 01, 2020

May 01, 2020 - PRESSADVANTAGE -

Old Bridge, NJ based Safe Care Ambulance is pleased to announce that local drivers now have the opportunity to give their cars a Covid Cleanse: an immersive vehicle cleaning fog that is already being used to disinfect their company's own vehicles. Safe Care Ambulance specializes in providing safe, effective and swift means of transportation to the physically challenged as well as handicapped individuals, and they have long proved the efficacy of their cleaning regimen through their work. Today, they invite the local public and EMTs to make use of their services in order to preserve both the safety of the people they transport as well as themselves. Learn more here: <https://safecareambulance.com/covid-cleanse>.

Peter Siskini, the president of Safe Care Ambulance states, "We are ready and willing to offer our services to drivers who want the same fogging solution used on their cars as we use on our ambulances. Our ultimate goal is to reduce the transmission of this deadly virus among members of the public, just as we do for our patients and staff on a daily basis. We would like to reassure the drivers in our community that this process will not inconvenience them unnecessarily or force them to leave their car with us for an extended period of time. In fact, the solution requires about 5 minutes to apply, following which drivers will wait about 5 minutes before they can drive off and go about their day."

The company expects that this service will be particularly useful for cars that see constant use and/or are used to transport many people. While EMTs have an obvious advantage to gain by utilizing Safe Care Ambulance's Covid Cleanse, the company points out that drivers who offer rideshare services (via Uber and Lyft, for instance) are likely to see a great benefit by having their cars treated on a regular basis as well. Given that the pandemic is expected to be a problem for some time to come, such drivers may be forced to continue their services simply to make a living. With Safe Care Ambulance's help, however, they can add a layer of security that helps protect both their passengers and themselves from the risk of infection. Notably, the company allows minivans to undergo the Covid Cleanse as well, so the service may be an attractive option for some large families (though traveling in such groups should be avoided if possible).

Safe Care Ambulance continues, "Our fogging solution is perfect for drivers who worry about having to transport passengers who may already be infected. This includes Uber or Lyft drivers who want to take additional precautions, people out shopping with lots of goods or food items in their car, limo drivers who want to present a clean vehicle to their VIP clients, and so on. The list is quite extensive. If you have any concerns regarding your vehicle's suitability for the treatment, we encourage you to reach out to our customer service team. They will help you ascertain whether our service is right for you and how early you can get your Covid Cleanse."

Notably, the company is most keen to offer their services to their peers in the field: EMTs who are currently working to transport people to medical facilities. While details surrounding the pandemic have gripped the current news cycle, EMTs are still working with victims of accidents and other incidents, each of whom has the potential to be infected with COVID-19. As such, it is vital for EMTs to disinfect their vehicles as often as reasonably possible. To do their part, Safe Care Ambulance states, "We also offer a special EMT rate to reward these heroes on the front lines. Our business relies upon EMTs, and we want to clearly show them we appreciate their efforts. EMTs do not have to work at Safe Care Ambulance to enjoy this discount."

More information can be found on the company's website, and interested parties may reach out to Peter Siskin of Safe Care Ambulance in order to follow up on any further inquiries. Social media users are also welcome to communicate with the company through their Facebook page, which can be found here: <https://www.facebook.com/safe911/>.
