

Stethoscope Company Helps Out Respiratory Therapist Students

August 24, 2015

August 24, 2015 - PRESSADVANTAGE -

Valencia, California -- Passionate Care LLC is helping offset the cost of a Master Premium Stethoscope for respiratory students as they begin their semester back at school. Most respiratory therapist schools do not include a stethoscope in their welcoming packages and those that do usually provide a basic or starter stethoscope. With tuition taking up most of the student's money, Passionate Care is stepping in to help offset the cost of a high quality stethoscope.

"I remember listening to a patient lungs and being scared that I would not be able to distinguish between breathe sounds. Are those crackles I hear or just rhonchi? That is a very important question because the treatment is different depending on the sound; and I don't want to get that wrong," exclaimed Jose Herrera, Respiratory Therapist. "I've already been out of school for two years and I can tell you that it is a big deal to know your breath sounds. It ticks me off now that I realize that I was in an unfair position as a student, because not only did I not know my breath sounds well, but with the cheap basic stethoscope they gave me I couldn't even hear enough to distinguish. That's two strikes against me from the start."

High end professional stethoscopes with quality sound can be purchased in many specialty stores and the

prices usually start around \$89 with the better models easily running in the hundreds of dollars. In celebration of starting the noble profession of respiratory therapy, Passionate Care LLC has decided for a limited time to lower the price on its Premium model. On top of top of that they are running a welcome to respiratory school special on Amazon by offering an additional 30% off coupon.

The Amazon coupon code is only valid for the month of August and will expire. There is a limit to just one stethoscope per student and students are encouraged to share the coupon with their classmates. To receive the discount students just have to add the stethoscope to their cart and upon checkout enter the coupon code: CLRLUNGS

?It?s hard enough being a student in any health care field. Most students are going through school and carrying a full time job not only to help pay for school but also to take care of their families. The world doesn?t stop just because a person decided to become something greater and enrolled in school. No, it?s stressful and we just wanted to stack the chips a little more in their favor as an encouragement,? stated Raul Meza, Co-Founder of Passionate Care LLC. Meza finished by saying, ?It?s a way of saying that they are making the right decision in being brave and sacrificing for a little while so that they can reap the benefits for a lifetime. Besides it could be someone from my family whose lungs they are listening to. I want to make sure they are confident in what they hear.?
