

The Eleven Plus Tutors in Colchester Offer Online Tuition via Videoconferencing

May 19, 2020

May 19, 2020 - PRESSADVANTAGE -

The Eleven Plus Tutors in Colchester have announced that they have been successfully providing online tuition in Colchester, England, through videoconferencing especially during the period where face-to-face tuition is not possible. The 11 plus tutor Colchester team is made up of experienced and highly adept teachers from various speciality areas. These teachers can help students with their 11 plus, an examination that is given to students in England and Northern Ireland during their last year of primary education.

The 11 plus is also known as the transfer test and is designed to test a student's ability to solve problems utilising an examination of verbal reasoning and non-verbal reasoning. The 11 plus is used to find out which type of school the student should go to after primary education, whether it would be a technical school, a secondary modern school, or a grammar school.

James Goldsmith, Academic Director at The Eleven Plus Tutors in Colchester, says, "If you and your child are finding it difficult to manage school and work together with the tuition, then we have a solution. We have developed our extensive summer program where our tutors cover a wide range of different courses during summer weeks. All of these are designed to be fun, as well as help the students to grow their knowledge."

He adds, "Ready to get started? Then get in touch with the office to talk in person with our team about how we can help your child achieve all that they are capable of."

The Eleven Plus Tutors are located at Sheepen Rd, Colchester, CO3 3LL, and their phone number is 01206 214109. The team of teachers are adept in creating environments that are designed to motivate students to excel within those subjects and skills that are required by the 11 plus exam. They offer programs that include workshops for exam preparation and revision plans based on techniques that have been researched extensively. Continual assessments are performed throughout their tutorship programs to allow the tuition sessions to adapt and change as the student progresses and improves. Those who are interested may want to contact them through their website at 11plustutorsincolchester.co.uk.

Meanwhile, the 11 plus tutors at Colchester believe in the importance of a robust partnership between the tutor and parent. Working with each child, the tutor will regularly consult with the parents and discuss the child's progress and requirements and adapt and change the tutoring provided as needed. This establishes trust between the parent, the tutor, and the student. Through robust communication, the tutor can also offer tips and advice to the parents. This will also help them overcome any obstacles that they may encounter along the way.

The tutors work with students on a one to one basis and this allows them to develop a picture of what the children need as well as their strengths. The tutors will also be able to fully comprehend those learning approaches and techniques that will help the children truly make the most of their tutoring sessions.

It should be noted that while the school environment is all about team work and learning in big groups, this may not always provide good results. Sometimes a child will require a one on one tuition with a tutor through personalised sessions.

In the one to one tutoring sessions, the tutors usually visit the home but with the Covid-19 situation, these are currently done through videoconferencing. Because of the amount of preparation and materials that they need to get through, they recommend that students start tuition at least one year before the 11 plus exam. It should be noted that while nobody can guarantee that the child will pass the 11 plus exam, they can substantially increase the child's chances of success and they have been able to establish an outstanding record.

Those who are interested in an 11 plus tutor in Colchester may want to check out The Eleven Plus Tutors website, or contact them on the phone or through email.
