How to Clean, Restore And Maintain Alcantara

August 24, 2015

August 24, 2015 -
ColourLock posted another blog post today. Their newest blog post was about cleaning, restoration and maintaining Alcantara. This blog is primarily intended to offer tips and hints for people on how they can take care of this material and how they can make the most out of the use of it.

ColourLock said in the blog post that Alcantara is the artificial and ultra micro fine material which looks the same with suede. This is not a natural material such as leather and it is developed and used as the best alternative to suede. Alcantara was originally created and developed in Japan during the early 1970s and these days, it is used in clothes, furniture and cars (on the headliners, dash trimming, seating and steering wheels. Those who wonder about the best way to take care and maintain this material will get all the answers they have in mind when they read the newest post of ColourLock.

This company specializes in leather care, repair and restoration. This company is selling a wide selection of products that are mainly suitable for car leather care and furniture leather care.
