

## **Mr. Chem-Dry Offers Professional Carpet Cleaning Services To Provo, Utah Homeowners**

*May 25, 2020*

May 25, 2020 - PRESSADVANTAGE -

Centerville, Utah based Mr. Chem-Dry is pleased to offer their professional carpet cleaning services to residents of Provo and the surrounding areas.

As noted on a blog post published at <https://www.mrchemdry.com/provo-utah-carpet-cleaning.html>, Mr. Chem-Dry aims to bring customers the most advanced and unique home cleaning solutions on the market. The company is known to have the skills and expertise required to care for, maintain and clean all kinds of household upholstery and fabrics, with a specific focus on carpeting.

Daryl Olsen, a representative for the company, says, "We are all aware that carpets are some of the most used and abused fabric in our homes. Aside from possible dirt and grime that come from the outdoors, we must also remember to watch out for grease as well as spilled food and drinks. Heavy fumes from a resident smoker or the fishy aroma from cooking seafood in the kitchen can also cause one's carpet to become smelly and dirty."

Although there are a variety of contaminants that can ruin one's carpet, Olsen states that Mr. Chem-Dry can

provide the best solution for a carpet that is in need of a proper cleaning. Mr. Chem Dry utilizes the most effective methods and equipment to remove every trace of dirt and mud as well as the stickiest, most acrid smells out of any carpet, effectively providing Provo homeowners with the best carpet cleaning solutions they can rely on.

Furthermore, the company places a high priority on being respectful of the environment, which is why they ensure that the methods and chemicals they use for cleaning are eco-friendly. The company, a Chem-Dry franchise, uses a time-tested and trusted technique for cleaning fabrics, upholstery and carpets by means of deep cleaning. Chem-Dry's natural and environmentally-friendly cleaning solution is able to go deep into a fabric and remove all the dirt, odors and even stains right out of it. The cleaning solution that the company uses is exclusively made out of environmentally-friendly materials, which means no strong chlorine or other hazardous chemicals are present in the said solution. Due to this lack of strong chlorine and similarly dangerous chemicals, the solution's use also enables the preservation and protection of the fabrics in question.

In addition, Mr. Chem Dry's proprietary cleaning process results in much more water being saved than conventional alternatives (like steam cleaning). The company explains that they use approximately 80% less water than other typical carpet cleaning methods. As less water is used, the drying time of the carpet is also significantly shorter. Mr. Chem-Dry states that carpets will dry in 1-2 hours via their cleaning process?instead of 1-2 days, which is the usual drying time for a typical steam cleaning.

Aside from the company's cleaning method being safer for the environment, Mr. Chem-Dry points out that their cleaning solutions are also safer and healthier for humans. Unbeknownst to many, soaps, disinfectants and detergents that one normally uses for cleaning can actually leave behind trace residues and allergens that can make them very sick. Fortunately, Mr. Chem-Dry's process is a safer alternative to conventional carpet cleaning solutions because they only use fast-acting cleaning agents. Given that it dries completely in a short period of time, it leaves no trace residues or allergens that could be inhaled and cause sickness.

The blog post goes on to explain that carpets are made from strands of cloth fiber that are typically covered in grime, dust and pollen. By using Chem-Dry's natural cleaning agent, these strands of threads are bathed in hot carbonated cleaning bubbles that instantly dislodge all the foreign matter from the fabrics. This cleaning procedure has multiple benefits?it restores fabrics to their original vibrant colors and effectively evicts any foreign bacterial menace as well as any allergens that can be found in or on the carpet.

Mr. Chem-Dry is a professional cleaning company that serves the Salt Lake, Davis and Weber counties. They guarantee the best cleaning service possible to their clients. The company offers a variety of cleaning

services, such as carpet cleaning, rug cleaning, tile cleaning, upholstery cleaning and water damage cleanup.
