Park City, Utah Carpet Cleaning Service Now Ready To Serve New Customers

May 18, 2020

May 18, 2020 - PRESSADVANTAGE -

Utah based Chem-Dry of Park City is pleased to inform the members of their community that their professional carpet cleaning services will now be available for those who were unable to schedule a cleaning during the lockdown. The company also wishes to reassure their customers that they are taking every precaution necessary, as advised by healthcare authorities, in order to safeguard the wellbeing of everyone involved. This policy extends to both the company's employees as well as their customers.

Anyone who cares about their carpets will know that it is not as easy as vacuuming the surface and calling it a day. Carpets, even expensive carpets, may see a lot of foot traffic, and they accumulate many types of dust and debris over time. This detritus also tends to sink deep beneath the surface layers of the material, making it virtually impossible for the average homeowner to clean on their own, not if they want the job to be done thoroughly. In addition to this, most if not all carpets are sensitive to harsh chemicals, so they cannot simply rely on store-bought detergents if they wish to preserve the material's texture and integrity.

The solution, according to the company, is to hire a professional service that boasts a long history of experience in cleaning carpets and rugs to their customers' satisfaction. This is largely due to the fact that a

professional service will have both the expertise and the tools necessary to free a carpet of any and all dirt that lies hidden beneath its surface, but the company points out that such a service will also take each carpet's long-term durability into account.

Detergents that are commonly available on store shelves, for instance, are more likely than not to damage a carpet they are used on. While few will fail to notice a much rougher patch on their carpets following the use of such chemicals, the company warns that some detergents will erode a carpet's surface over a relatively long period. A single use may not seem to do any damage but it could be that the erosion is simply not visible to the naked eye or even to the touch.

While some may believe this is an acceptable compromise, the company observes that many families prefer to keep and maintain their carpets over the course of many years, and this is far more the case if the carpet in question is a family heirloom. Over such a long period of time, repeatedly subjecting a carpet to an unsuitable chemical will likely damage it beyond repair. The best approach is always to consult a professional.

The company asserts, "With ChemDry's carpet cleaning, you are going to get their unique approach to getting your carpet clean and leaving your home healthier too. Their equipment uses the power of carbonation, which extracts more dirt and grime from your carpet getting down deep into the fibers. What's nice about that is that they only use half the amount of moisture other steam cleaners require. This technique will allow your carpet to dry much quicker, and this will prevent any mold or mildew from growing underneath the carpet. Their signature cleaning solution brings dirt to the surface and whisks it away. This kind of cleaning is non-toxic and safe for pets and children."

The company's confidence in their own abilities is borne out by the reviews they receive from satisfied customers. Amy Day says in their 5-Star Google review, "These guys were amazing! My carpets have never looked so good! I have been debating whether I should replace them or not but with Christmas coming, I decided to wait. I'm glad that I decided to get them cleaned instead. They look great, and I saved money by not getting them replaced! I will for sure use them again!"

Michael Butler says in another 5-Star review, "They work hard and get good results. Love the ChemDry method. So safe and always does a great job of cleaning without leaving residues in the carpet to attract dirt again."

Customers are welcome to get in touch with Daryl Olsen of Chem-Dry of Park City in order to follow up on any further inquiries or schedule their next carpet cleaning. More information is also available at the following
