

Refresh Face And Skin Rejuvenation Updates Website On Hair Removal And Other Services

August 31, 2015

August 31, 2015 - PRESSADVANTAGE -

Refresh Face and Skin Rejuvenation, a health and beauty company in Applecross, WA, Australia, is proud to announce the completion of the updating of the company's website. What this means is that information is much easier to find and the site, which can be seen at <http://refreshipl.com/>, will also load much faster than before.

De Rinaldi from Refresh Face and Skin Rejuvenation says: "We realized that our previous website wasn't up to modern standards. So we focused first of all on creating fantastic products and then looked into marketing it using modern technology. We are very proud of the new look and feel, as well as speed, of our website and feel it is representative of the quality of the products we carry."

De Rinaldi is a registered IPL nurse with over 20 years experience. She offers IPL hair removal, wrinkle fillers, skin rejuvenation, dermal fillers, and anti-wrinkle injections. She aims to offer her clients a professional and very relaxing service. Having been a registered nurse for many years, working in emergency rooms, ICUs and burns units, she knows like no other how important a person's skin is for overall self-esteem. She has also gained experienced working all over the world, including London, Savannah, Tucson, Seattle and

Columbus. This has enabled her to study different techniques and offer only the best to her clients.

Focusing also on local marketing, the website is now listed with True Local on <http://www.truelocal.com.au/business/refresh-face-and-skin-rejuvenation/applecross>. Customers and clients are encouraged to visit this listing and leave reviews after they have received treatment. The listing also includes all relevant information in terms of opening times, treatments and prices.

Another local marketing effort is seen on the business' Foursquare listing on <https://foursquare.com/v/refresh-face-and-skin-rejuvenation/54e00ac2498eab5eae1cbeb9>. Having only just been listed there since the website was updated, clients have not yet left any tips. "I really want to encourage my clients to visit these listings and tell the world what they experienced," adds De Rinaldi. "It is an opportunity for them to share their opinions and for me to learn how to improve my service even further. This lies at the heart of my customer relationships."
