Inessence Oil Diffuser Celebrates One Year Anniversary

September 08, 2015

September 08, 2015 - PRESSADVANTAGE -

Inessence Diffusers, a company based in Deerfield Beach, CA, are proudly celebrating the fact that their flagship product, an ultrasonic oil diffuser, has been available for one year. And to celebrate this milestone, the company will be holding a limited time only birthday sale. To access the sale, customers are provided with coupon code H8K3HEOY, which they can enter at checkout for a 15% discount. The sale for the Inessence Oil Diffuser will end on September 14, 2015, at 11:59 PM PDT.

"This year has literally flown by and it has been a roller coaster of positive vibes for us," says Adrian Whittle from Inessence Diffusers.

"We have received hundreds of positive customer reviews, and we cannot thank our customers enough for their continued support and belief in our product and company. The birthday sale really is the least that we can do."

The Inessence Aroma Diffuser is designed to fill the room in which they are placed with aromas. Additionally, it helps to humidify the air, which has been shown to be beneficial for overall health. Customers

can choose their favorite essential oil to add to the diffuser, thereby also accessing the benefits of aromatherapy. Finally, the color changing lights make this diffuser a great item to have in a bedroom or to entertain the children with.

Research has shown that it is very important to have the correct humidity levels in any household. While some rooms, such as the bathroom, may be better suited to have a dehumidifier, heavy traffic rooms like living rooms, bedrooms and salons often have too low levels of humidity. This can be dangerous to health, as it allows germs and bacteria to find the perfect breeding conditions. In fact, scientists believe that many asthma attacks are caused by people spending too much time in rooms with inadequate humidity.

"Our customers are really noticing the difference when they use our essential oil diffuser," adds Adrian Whittle. "They feel that they can personalize it by using an essential oil of their choosing, but they also find that they can breathe and sleep easier. We want to wish our product a happy birthday and we want to thank our customers for their full year of ongoing support."
