

Roofing Contractors in Littleton CO Receives New Five-Star Review

June 03, 2020

June 03, 2020 - PRESSADVANTAGE -

Ropa Roofing, a firm based in Golden, Colorado that offers roofing services in Littleton and neighboring areas, has announced with pride that they have recently received a new five-star review from a satisfied customer. The company trains local roofing professionals to enable them to handle all types of roofing projects. They have formed partnerships with some of the best roofing brands like GAF, Owens Corning, CertainTeed, and more. They provide residential roofing, commercial roofing, and other services like gutter installation, siding repair, hail damage repair, and storm damage claims.

For residential roofing, they offer several services. These include roof shingles, asphalt shingles, metal roofing, wood shake roof, roof tiles, slate roof, and window installation. For commercial roofing, they offer EPDM flat roofing, PVC roofing, TPO flat roofing, and torch down roofing. They want to point out that their primary mission is to make their customers' lives easier, ensuring that they provide the appropriate services for their customers from day one. There are a number of factors that make Ropa Roofing stand out among the crowd. These include the provision of free estimates, excellent customer service, friendly and professional roofers, speed and efficiency, long-lasting and great-looking roofs, warranties for materials and workmanship, and 15 years of experience in roofing.

In the latest Ropa Roofing customer review, Tim F. gave them a five-star rating and said, "The owner Brent [is the] most honest, trustworthy, down-to-earth person I've come across in the roofing business. And I've dealt with a ton of roofers. Don't hesitate to go with Ropa! The whole team is phenomenal."

For residential roofing, they offer new installations, replacements, and maintenance. For new installations, they can provide architectural shingles, metal, slate, clay tiles, wood shake, and more. Some homeowners go for a replacement because they want another kind of roof for their recently-purchased home or their roof has been damaged beyond repair. And for those who want their roofs to last, yearly inspections can be provided to ensure that any issues with the roofing can be corrected as early as possible to prevent the issue from becoming worse.

For commercial roofing, they can provide EPDM flat roofing services. Commercial property owners with flat roofs often choose EPDM because it is durable and long-lasting, cost-effective, and offers excellent insulation and ultraviolet rays protection. Ropa Roofing guarantees roof installation, repair, or replacement using the EPDM roofing material.

They also offer roofing installation, repair, or replacement using PVC roofing materials. PVC roofing has been observed to offer the best when it comes to weather-resistance and flexibility. PVC roofing is a single-ply membrane that is available in various sizes and thicknesses. PVC roofs are reinforced with talc and fiberglass, allowing them to resist strong winds, fires, chemicals, UV rays, and more. PVC roofs offer excellent insulation and can handle heavy foot traffic. This type of roofing also requires minimal maintenance compared to other single-ply flat roof membranes.

Thermoplastic polyolefin or TPO roofing is for those who want a durable roof that is highly energy-efficient. TPO is made from rubber and other substances that contribute to its strength and its highly reflective surface that prevents heat from penetrating. And finally, Ropa Roofing offers torch down roofing for commercial buildings. This is an extremely popular type of commercial roofing because of its capability to withstand extreme weather and temperatures and has a lifespan lasting for decades. Torch down roofing also offers enhanced leak resistance, safety, and property insulation. Furthermore, while tar and gravel roofs make use of similar multilayering and torching techniques as torch down roofing, materials for torch down roofing are less noxious than tar, thus ensuring safer indoor air quality.

Homeowners and other property owners who need roofing contractors in Littleton CO and nearby areas may want to check out the Ropa Roofing website or contact them on the telephone or through email. They are open 24 hours a day, from Monday to Sunday. However, customers are advised to contact them first

because hours or services may vary because of the COVID-19 pandemic.
