

Private Dentists in Walton-on-Thames Share Invisalign Clear Braces Treatment Tips

May 26, 2020

May 26, 2020 -

Leading private dentists in Walton-on-Thames at Walton Dental Surgery have provided expert tips on choosing a provider for patients who are considering Invisalign treatment. Patients can contact the practice to book for a smile assessment and even preview their new smile before starting treatment.

Dr Kunal Pareek (KP) and Dr Gurmeet (Gary) Pahuja have provided expert tips on choosing a provider for patients who are considering Invisalign treatment.

More information about Invisalign treatment offered at Walton Dental Surgery can be seen here: http://waltondental.co.uk/invisalign/.

Invisalign is a leading mainstream choice to straighten teeth fast and virtually invisibly, with over 7 million completed treatments worldwide. Treatment is suitable for a wide range of orthodontic concerns including crowded or crooked teeth, gaps, overbite, underbite, crossbite and other issues. Treatment is based on

wearing a set of clear aligners which are smooth, comfortable and removable.

When considering orthodontic and Invisalign treatment, the dentists at Walton Dental surgery advise patients to consider all the benefits Invisalign can provide.

Firstly, Invisalign aligners are virtually invisible and so discreet that hardly anyone notices someone is wearing the clear braces. This is a significant advantage for patients as there is no need to wear highly visible metal braces which makes many patients feel self-conscious. There is minimal impact on one?s social or professional life.

Secondly, as aligners are removable, patients have the freedom and flexibility to take their aligners out, for example, for a special event, photographs, meetings etc. Patients can also enjoy all their favourite foods and drinks without having to limit or restrict their choices, just because they are having their teeth straightened.

Thirdly, Invisalign is more comfortable than traditional metal braces. There are no wires or metal brackets to cause discomfort. In addition, oral hygiene is easy to maintain. Patients can simply remove their aligners and brush and floss in the normal way. There is therefore less chance of staining, inflammation, swelling, gum disease or bleeding gums from happening during an Invisalign treatment.

And Fourthly, Invisalign also makes special considerations for teens requiring teeth-straightening. The aligner series in Invisalign Teen allows for the mouth and teeth of the teen to grow during the treatment. More information on Invisalign Teen can be found here: http://waltondental.co.uk/invisalign-teen/.

Drs KP and Gary recommend choosing a quality provider who has a competent team and is able to provide complete care from start to finish and also be able to provide regular annual after-care check-ups to ensure that the teeth-straightening treatment benefits the patient for the long term. Patients should choose a dental practice that ensures they will achieve the best possible results.

Walton Dental Surgery has been serving the community in Walton-on-Thames and the surrounding areas for more than a decade with private dentistry. Patients seeking teeth-straightening treatments can bank on several years of collective experience that the team at the dental practice has accumulated over the years and has resulted in many patients leaving glowing reviews on Google.

Liliana A. wrote: ?I have had the best experience of my life regarding dental treatments. I was always anxious and scared of going to the dentist, but this wonderful team made my anxiety gradually disappear. I had the intravenous sedation which allowed me to relax and do most of my treatment and everything went smoothly, no pain whatsoever. Definitely recommend this dental practice as it's the only one I will keep coming to. Thank you all so much for everything you have done and still do for me on my ongoing visits.?

Shahram A. left the following review: ?Can't recommend enough. Lovely team, receptionist is extremely professional and very welcoming. Dentist and assistant are thorough and experienced.?
