

Projects by Design Helps Business, IT Teams In Building Effective Project Delivery Systems

May 27, 2020

May 27, 2020 - PRESSADVANTAGE -

Projects by Design, a professional services consulting organization in Bluffton, SC, shares the most effective methodology in transforming project teams into high-performing, delivery-based, powerfully effective, focused, value-added entities. The company does it by taking a lean approach with connecting capabilities to customers.

According to the consulting firm, there are several challenges in engaging project teams to deliver value to the customer. One of the common dilemmas is how to reduce the time to market for their products and services. Most businesses also question how they can do it when their capabilities, technology, customers, and people are constantly evolving.

In response to these dilemmas, Projects by Design presents a four-step process that businesses and teams can follow. "Our four-step process provides the ability to clarify your capabilities, efficiently engage your customer, build team responsiveness, and deliver value-added solutions," they added.

The first step is clarifying team capabilities. A good understanding of the project team's current and desired

capabilities is essential in determining how to structure the project delivery they need. Projects by Design can help by guiding teams through a capabilities assessment. It will allow project teams to make informed decisions on selecting the right learning or transformation strategy for their organization.

The second step, according to the Best Agile Training Provider in Bluffton, SC, is building a strategy. A good understanding of where a team wants to go will enable them to create the roadmap to get there. Projects by Design offers their experience and knowledge on building project delivery strategy, leveraging best in breed methodologies in today's challenging environment.

On the third step, Projects by Design also assures to help any team start their journey in becoming a learning organization. "We will walk alongside as you realize your goals of being a more effective and efficient project delivery organization," they added.

And lastly, the final step is project delivery or when the team's objectives are met.

"Since every project situation is unique and every customer is different, and teams are growing, scaling, and adapting ? each project needs a method by which it can be uniquely designed for that situation," adds Projects by Design.

Projects by Design likewise provides project management staffing solutions. Their specialization includes systems implementation and business process design projects using lean, iterative, incremental, and agile delivery methodologies.

The company also offers free online courses. They provide lessons on project canvas. They also have classes on an effective agile framework implementation strategy that focuses on the four key components of developing an effective strategy. A course on how to use Tuckman's Ladder, a new online team development strategy was also added online by the company.

"At Projects by Design, we combine our practical experience as project managers with the best in class professional best practices and instructions to deliver the highest quality project management products and solutions for your team," they add.
