

New Ductless AC Site To Reach Residents In The Twin Cities Area

June 01, 2020

June 01, 2020 - PRESSADVANTAGE -

Minneapolis, MN based DuctlessACTwinCities.com is excited to announce that their brand new website has been launched. The purpose of the website is to promote ductless air conditioning in the Twin Cities (Minneapolis and Saint Paul), Minnesota area. With summer due in a few short months the new website will help local residents realize the ease with which they may introduce the latest and greatest in efficient AC technologies to their homes.

The website places particular emphasis on Daikin products, given that the company is the world leader in ductless technology. While ductless air conditioning represents one of the most hassle-free methods of adding an AC system to a home (or upgrading an existing one), Daikin's systems are noteworthy for several additional factors that have as much to do with their commitment to excellent customer service as it does to the high quality of their products (which are also renowned for the reliability of their products).

For instance, Daikin offers an extremely competitive guarantee of ongoing support through Center Point Energy's Home Service Plus program, which includes a 12-year parts and labor warranty on Daikin Ductless Air Conditioning. In addition, Ductless AC Twin Cities is always eager to help their customers pursue their

desired system via a slew of attractive finance options. Qualified customers can finance through Home Service Plus with no finance charges for 3, 12, or up to 24 months. There is also an option for long-term financing up to 60 months that is available at attractive rates. As the website states, "Adding a ductless air conditioner to your home or office is a great way to ensure a comfortable summer. We make purchasing a new air conditioner easy and affordable, with options for every homeowner."

Ductless AC Twin Cities understands that many homeowners will not want to settle for anything but the best, so they are pleased to recommend the Daikin Emura® Single Zone Mini Split, an intelligent AC system that the company believes will be the answer to many homeowner's air conditioning requirements. They state, "The next generation of home air conditioning is here, offering smart technology within a sleek, curved silhouette. The Daikin Emura® Ductless Mini Split makes a modern design statement in any home. Inside the understated interior is a highly intelligent system that can be controlled remotely via the Daikin Comfort App even away from the home. The Emura® is available in silver or pure matte white."

Homeowners should note, however, that the Emura® is not a catch-all solution. Its compact nature and capabilities are specifically tuned to add the flexibility of air conditioning to a limited interior space (approximately 1400 square feet or less). This makes the system perfect for bedrooms and other living areas as well as specific locations where the temperature has previously been harder to control. Given the system's relatively simple installation process and the fact that it does not require ductwork, the Emura® can be placed in locations where it is needed the most. On one hand, for instance, it can be used to supplement an existing air conditioning system. On the other, it can be used in more extensive endeavors, such as converting garages or attic space into livable areas.

The Daikin Emura® comes with many features that make it a must-have for many homes. These features include the Daikin Control App, Daikin Inverter Technology, 3-D Airflow, 2-Area Intelligent Eye, and many more. It also boasts a high degree of efficiency that will reassure those who have concerns regarding associated utility and environmental costs. As Ductless AC Twin Cities explains on its site, "When it comes to measuring performance, it's important to know that cooling specs are different. In either case, the higher the number the better, because higher efficiencies equate to savings on your utility bill."

More information can be found on the new website, which can be accessed on a variety of platforms, including laptop, tablet and mobile. Interested parties may use the Contact Us form on the site or call (612) 344-9123 for more details. Learn more at the following link: <https://ductlessactwincities.com/>.
