## Ethos Spa Skin & Laser Center Announces Reopening

*June 15, 2020*

June 15, 2020 - PRESSADVANTAGE -

Ethos Spa Skin & Laser Center, a medical spa based in Summit, NJ, has announced that they are once again open for patients starting June 1. This means that clients in New Jersey and neighboring areas may be able to benefit from their state of the art aesthetic treatments, especially Botox, which may be used to get rid of wrinkles, unwanted fine lines, and crow's feet. Botox is a natural protein obtained from a natural bacterium that is usually found in nature, in places like lakes, forests, and within mammals and fish. It does its work by allowing the muscles to relax.

Hardik Soni, founder and medical director of Ethos Spa, Skin & Laser Center, says, "We're so excited to announce that we are now once again open to serve our clients. We invite you try our services, such as Botox, which may be able to help you in a number of ways. These include acne management, chin and jawline softening, reduction of excessive sweating, neck smoothing, twitching eye treatment, nose job similarities, lip lifts, migraines, and more."

He continues, "We specialize in state of the art aesthetic treatments for clients in New Jersey and the nearby areas. We are dedicated to offering the safest and most effective of medi spa solutions ensuring beautiful and

long lasting results. We offer advanced med spa technologies and non-invasive treatments to enhance the look of your skin.?

At Ethos Spa Skin & Laser Center, they provide several Botox-related services and the results can be seen on photos posted on their Facebook page. One of the most common applications of Botox is facial and skin care. It has been observed that facial care is at the top when it comes to the reasons for using Botox cosmetic solutions in New Jersey. This is because it can serve to remedy various facial issues, such as forehead lines, frown lines, lines and wrinkles, crow's feet, the need for skin tightening, acne scars, and more. Botox may also be used in place of invasive plastic surgery, such as cheek augmentation, eyelid surgery, and more.

Another area where Botox may serve as an alternative to plastic surgery is breast augmentation. Whatever the reason for wanting a breast augmentation procedure, whether it is breast reconstruction issues, breast asymmetry, the need for breast lift or breast reduction, Botox breast augmentation injection is now an alternative to breast surgery and breast implants. With Botox injection, the breasts can be made fuller and tighter in just a few days. It is also possible to work on either breast or both to attain the symmetry and size that is desired.

Botox cosmetic solutions have also been found to be helpful in treating excessive sweating, especially under the armpits. And for those who suffer from chronic migraine, Botox may be used as treatment.

It should also be mentioned that Ethos Spa Skin & Laser Center offers several leading body care solutions that may help people enhance their lifestyle and enjoy their body once again. These include the thigh lift, spider vein treatment, arm lifts, vaginal rejuvenation, skin resurfacing, fat transfer, body contouring, body lifts, neck lift, cellulite treatment, and skin rejuvenation. They also offer laser hair removal to get rid of hair found in the wrong places. This is a long term solution for eliminating unwanted hair.

And one of the most popular procedures for dermal fillers in New Jersey is non-surgical lip augmentation. This can offer results that are similar to those provided by plastic surgery at only a fraction of the cost. Dermal fillers may be the solution for those who want to change the shape of their upper or lower lip, or add volume to their thin lips.

People who are interested in learning more about the Botox cosmetic solutions and other services provided at Ethos Spa Skin & Laser Center may want to check out their website, or contact them through the telephone or via email. They may also want to follow their Instagram page.
