NJ Center for Cool Sculpting Announces Reopening

June 15, 2020

June 15, 2020 - PRESSADVANTAGE -

NJ Center for CoolSculpting, based in Summit, New Jersey, has announced that they are now open once again to serve their clients. This means that they are now able to offer their services, particularly CoolSculpting®, which is a revolutionary non-surgical method for getting rid of stubborn fat. For those who will be taking advantage of CoolSculpting® for the first time, they can benefit from a \$1,200 discount from its regular price. NJ Center for CoolSculpting is a division of Ethos Spa in Summit, NJ, and their staff is composed of certified aestheticians, licensed physician assistants, and board-certified doctors, who are the leading experts in body contouring.

Hardik Soni, medical director of Ethos Spa, says, "We are New Jersey's top center for CoolSculpting®. Our CoolSculpting® doctors are masters of this revolutionary new non-surgical technique that freezes and eliminates stubborn fat. CoolSculpting® is FDA-cleared* and pain-free."

CoolSculpting® is an innovative technique of freezing unwanted fat cells. It is a fat reduction procedure that doesn't require invasive surgery. It is specifically targeted towards fat cells and it is offered as a pain-free alternative to liposuction. Unlike liposuction, it does not require a recovery time and because the fat

cells are frozen and then shrunk, these are then digested naturally by the body and there is no possibility for fat transfer. It can also be included in the popular in the Mommy Makeover procedure, which is designed to help women get their body back after they have given birth. Those who are interested in learning the location of NJ Center for CoolSculpting and other important information can check out their GMB listing.

It should be noted that because every body type is unique, some people will only require one session while others may need several sessions until the desired results are achieved. Fortunately, once the frozen fat cells are naturally removed from the body, they'll be gone for good. Many people may prefer CoolSculpting® compared to liposuction because the latter is a surgical procedure and will require sedation and anesthesia. Liposuction has the advantage of allowing the elimination of larger amounts of fat. However, fat freezing is a safer alternative for people who want to get rid of stubborn fat.

Furthermore, because CoolSculpting® is a non-invasive procedure, it will not leave scars. However, the technique will require the use of suction. Thus, a ring may be observed around the area for a brief period after the treatment. The procedure does not really hurt but the patient will experience an intense chilling in the area, which usually becomes numb within a few minutes. In addition to the cold, the patient will feel a little discomfort as the skin is suctioned against the machine.

CoolSculpting® can be performed on various parts of the body where there is stubborn fat. These include the arms, stomach, thighs, breast, buttocks, and the submental or chin area. That the procedure is really effective is evidence by the five star reviews previous patients have left on their Google Maps page.

For instance, Sarah M.S. says, "Ladies, do yourselves a favor and work with this clinic. I was so skeptical at first but they wowed me so much during my consultation that I immediately just got the treatment done on the same day. Fast forward to now and I'm loving my new stomach. I feel sexy and confident. Shoutout to the front desk girls for being awesome!?"

Meanwhile, Natalie M., who also gave them a five star rating, says, "I finally booked a session after seeing all the reviews... and I wasn't disappointed! My technician knew exactly what she was doing and made sure I was comfortable the whole time. Very professional and friendly staff. Awesome experience for a first timer like me!?"

Those who would like to know more about the CoolSculpting procedure may want to check out the GMB website of the NJ Center for CoolSculpting , or contact them through the telephone or via email. They are open from Monday to Friday, from 10:00 am to 6:00 pm, and on Saturdays, from 9:00 am to 4:00 pm.
