Community Heaps Adoration On Riverdale Car Accident Chiropractor

June 19, 2020

Riverdale, Georgia - June 19, 2020 -
GA based Arrowhead Clinic Riverdale is delighted to acknowledge the surge of praise and support they have received from the members of their community since they opened their doors to the public. Specializing in the reduction and eradication of pain and physical distress, the clinic?s services have led to happy patients sharing more than 700 glowing reviews on the Google platform alone.

The most notable aspect of this community feedback may be the fact that the clinic has managed to maintain a perfect 5-Star score despite the sheer number of reviews they have received. It is not uncommon for a business or healthcare provider of decent caliber to have a score in the upper 4s (4.5/5 or greater), since there are always clients who did not have a favorable experience for one reason or another. As such, it is a testament to the consistently high quality of Arrowhead Clinic?s services and the resulting gratitude of their clients that they have sustained a perfect aggregate score even after all this time.

For instance, Penny Warner?s enthusiastic review shares that, ?It is my absolute pleasure to give a 5-Star review to the Arrowhead Clinic staff at the Upper Riverdale Road location. Under Dr. Howard's care and supervision, I received top-notch care throughout my treatment plan. Dr. Howard is a warm, personable and

kind-hearted gentleman. I really felt that his treatment was beyond effective. He's very intuitive and highly experienced. Every single staff member was pleasant, helpful and friendly from day one. The staff are caring and supportive, just what you need when dealing with treatment after an auto accident. I cannot express enough gratitude to these amazing folks!?

Reviews appear to uniformly touch on the fact that the staff are as friendly and welcoming as they are experts in their field, and this is true for clients who have been going to Arrowhead Clinic for some time as well as those who have only just begun their treatments. Cindy Milner says that, ?This is my first week of treatment at Arrowhead Clinic Chiropractor in Riverdale. The entire staff is very supportive and caring. Especially Mrs. Tammy, she's always smiling and making sure you?re okay. I highly recommend them to anyone.?

Similarly, Patrick Garraud reports, ?My experience at Arrowhead Clinic is amazing. The receptionists are very welcoming. They take care of you and your knees as soon as you walk in. They also give you an assurance that everything will be OK. The nurses are always friendly and represent themselves respectfully. Every doctor I see here is amazing. They all have different techniques in adjusting. They're just awesome.?

According to Arrowhead Clinic, this feedback is representative of the services they have offered since they first began accepting clients?and they are also an indication of the incredibly high standards the clinic?s staff strive to uphold every day. In addition to ensuring that their clients want to come back or are happy to recommend the clinic to their friends and family, Arrowhead Clinic believes that this level of conscientious care is simply a vital aspect of the services they offer.

?Even low-speed car crashes have the potential to seriously affect how your body functions,? observes Arrowhead Clinic. ?Problems such as whiplash can take days or even weeks to begin troubling you because the true extent of your injuries may not be apparent for some time following your accident. Once it starts, however, our patients often find that their pain will take a long time to fade. Injuries of this sort even have the potential to get worse over time if left untreated, and the ongoing pain they cause can greatly reduce your quality of life.?

They conclude, ?Our patients come to use because they want their lives back, they want to start enjoying physical activity and relax without fear of exacerbating their pain because they happened to twitch in the wrong way. We consider it of paramount importance that we take their ailments seriously and take their full condition into account when we develop a plan for treatment. A part of this process simply requires that we try to put them at ease at all times. We find that it helps the healing process.?
