Mc Donough Chiropractor Explains Why It Is Important To Get Checked After A Minor Car Accident

June 19, 2020

McDonough, Georgia - June 19, 2020 -
McDonough, GA based chiropractic clinic Arrowhead Clinic - McDonough is reaching out to the wider community to share why it is important to see a chiropractor after experiencing a minor car accident. For over 40 years, the clinic has been serving the local community by helping car accident victims deal with headaches, dizziness, numbing, stiffness, memory problems, low back pain and more.

Dr. Robbyn Keating, a representative for Arrowhead Clinic - McDonough, says, ?If you?ve been a victim of a car accident, you should always see a doctor. If you?ve been in a minor car accident, you might think you?ll be fine even if you don?t see a doctor. But the truth is that there is no such thing as a ?minor car accident,? especially when it comes to long term effects on your health. Small issues that are caused by minor car accidents can lead to serious trouble later in your life, and you want to avoid that. For your health, safety and well-being, even if you aren't displaying any symptoms, it's in your best interest to get checked by a professional physician after any car accident.?

In a blog post on their website, Arrowhead Clinic - McDonough explains a few more reasons why it is important to see a chiropractor after a car accident. One reason is to take care of potential future problems

that may arise. As Dr. Keating explains, many individuals and car accident victims do not realize that the spike of adrenaline that is produced during an accident can mask both pain and the symptoms of severe injury. It is very common for pain and other symptoms to begin manifesting only after a few days or even a few weeks. When left untreated, they tend to get worse. By proactively visiting a doctor immediately after an accident, car accident victims can ensure that they will not face any issues later on.

Another reason is that it is important to have medical records if one is going to sue the negligent party responsible for the accident. The blog post reads, ?If a negligent driver caused your accident, you need to have valid records documenting your injuries and necessary treatments immediately following the accident. Medical bills, accident reports and police reports that were obtained immediately after the accident help your claims process. These records are needed for filing a claim with the insurance company. If you wait longer than two weeks to seek treatment, it will become increasingly more challenging to prove you were injured in your accident. The insurance company can argue that your injuries were presented too far after the accident occurred. They will likely claim that because you waited to seek medical care, your injuries were caused by something else.?

The post explains, ?This alleviates them from fault so they don't have to pay for your medical treatments. If you want to receive compensation for your pain and suffering in addition to your medical bills, you must see a doctor or car accident chiropractor right away. They will treat your injuries and create proper documentation of your injuries for the insurance company to reference.? The full blog post looks into several other reasons as to why one should visit the doctor?s after a car accident.

The dedication of the Arrowhead Clinic - McDonough team to their patients has allowed the car accident injury chiropractor to establish a positive reputation for themselves in the community. On the Google platform, the clinic has a perfect rating of 5 out of 5 Stars. In a recent review, Patrick Cummings says, ?I thoroughly loved my experience here. My doctor was amazing, the nurse practitioner was amazing and the staff were the best. I have no, I mean no complaints whatsoever about this facility and its staff. Thank you so very much to everyone who helped me get back to 100%. I'd recommend these ladies to everyone!?

Meanwhile, in another review, Sara C. says, ?Great staff in person and on the phone! It was very easy to make an appointment. I called the day before, and they were able to fit me in the next morning. They do walk-ins too! I like that they close at 7pm, later than most offices, so some people can make it after work if necessary. As a first time patient, the paperwork was simple. Once my paperwork was done, I waited about five minutes and was brought back into a room. The doctor was in the room shortly after. Dr. Keating has a great bedside manner and was very knowledgeable and informative. I will be back for future adjustments!?
