

Car Accident Chiropractor in Mc Donough Earns New Five Star Review

June 19, 2020

McDonough, Georgia - June 19, 2020 - PRESSADVANTAGE -

Arrowhead Clinic - McDonough, Georgia, has announced with pride that they have earned a new five-star review from one of their patients. The patient decided to provide a five-star rating for the clinic after noticing that they really care about their patients. The clinic is for people who need a car accident injury chiropractor in McDonough and nearby areas. Car accident victims need chiropractic care in order to ease the pain that they are suffering from because of their injuries.

In the new five star review, Maigan C. said, "Best staff! This clinic has been very helpful and I highly recommend this location for anyone that has suffered a car injury! They care for each individual as needed!"

Dr. Robbyn Keating, a chiropractic physician at Arrowhead Clinic in McDonough, responded to the five-star review, saying, "Thank you for the 5-star review! We appreciate all of the kind words about our staff and the recommendation. Thank you for choosing Arrowhead Clinic. It really makes us happy to receive such kind words, not just because it boosts our reputation but also because it is helpful feedback, proving to us that we are on the right track in our goal of offering the best chiropractic care possible."

Dr. Robbyn Keating wants to stress that there are a number of car accident injuries that they are capable of treating because of their many years of experience. These include neck injuries, back injuries, head injuries, and minor injuries.

Those who go to the Arrowhead Clinic in McDonough will be provided with a free consultation with one of their experienced chiropractors. This will allow the chiropractor to learn the details of the collision and also the patient's medical history. A thorough examination of the patient will also be performed, including pain and palpitation testing, joint and range of motion testing, x-rays, and neurological diagnostic testing. The chiropractor will then use the various information gathered to make a diagnosis and come up with a treatment plan. This treatment plan is designed specifically for the patient based on the injuries suffered and other needs of the patients.

As part of the treatment plan, various therapies may be used. These include spinal decompression therapy, electrical stimulation therapy, exercise and stretching techniques, physical therapy, manual spinal manipulations and adjustments, and instrument-assisted spinal adjustments.

And aside from auto accident injuries, the chiropractors at Arrowhead Clinic in McDonough also provide treatment for whiplash, work injuries, slip and fall injuries, bus accident injuries, truck accident injuries, motorcycle accident injuries, headaches, hip pain, sciatica, back pain, neck pain, and Uber/Lyft accidents.

Whiplash is a soft tissue injury that is commonly experienced by car accident victims. It should be noted, however, that whiplash can occur even when the vehicles involved in a collision were moving at relatively low speeds. Neck pain is usually experienced when the victim's car is hit from behind. This is because the sudden backward and then forward movements of the neck can cause the muscles and ligaments to over-stretch and possibly go into spasm. There are a number of possible symptoms of a whiplash injury. These include shoulder pain; tightness and spasm in the neck and upper back; neck pain; jaw pain; upper back pain; migraines, headaches, and dizziness, and burning and tingling sensations that radiate down the neck, arms, hands, and fingers.

Meanwhile, slips and falls may also cause injuries that can be treated by a chiropractor. Such injuries usually involve the musculoskeletal system and the nervous system. These are typically strains, sprains, and pain in the neck, back, and joints. Head injuries, such as traumatic brain injury, may also be incurred through a slip and fall accident. And finally, broken hips are also quite common. Victims of slip and fall accidents are advised to seek chiropractic care as soon as possible in order to avoid lifelong consequences.
