Marietta Car Accident Chiropractor Discusses the Causes of Whiplash in a Newly Posted Blog

July 01, 2020

Marietta, Georgia - July 01, 2020 -
Respected car accident chiropractor in Marietta, Arrowhead Clinic, has just posted a new blog article that discusses the causes of whiplash injuries. This progressive chiropractic care clinic often takes it upon themselves to better inform clients and others through their blogs about auto accident-related and other injuries and how best to treat them. It?s just one of the traits that have made Arrowhead Clinic ? Marietta so popular with those that have received or are receiving accident injury treatments from them.

Dr. Valentina Adcock, the blog author and a lead chiropractor at Arrowhead Clinic Marotta, says, ?One of the more common but misunderstood car accident-related injuries is whiplash. Many people do not realize that this is the type of injury that can happen in both high and low-speed auto collisions. It also is an injury that surprises many people because it may not reveal itself for several days after an accident. There is just so much information that those who suffer from whiplash simply do not realize it. That?s why we thought it would be a great idea if we added a blog post on our website that talks about the causes of whiplash and some of the treatments that we do to help people recover from it. We are very pleased with the response that we have gotten so far from accident victims and others that have read it.?

In Dr. Adcock?s new posted blog article, it started by saying that whiplash is actually a non-medical term that is used to describe pain in the neck area after an injury to the soft tissues in the neck. It is caused when an abnormal motion or force makes the neck move beyond its normal range of motion. The term whiplash was applied to this injury because the motion is similar to that of when someone cracks a whip. It happens most often in car accidents where the victim is hit from the rear but it can occur because of other reasons too. The blog article states that slip and fall accidents and sports injuries can also result in whiplash. According to the blog post, if someone starts to feel pain in the neck area as a result of a whiplash-type injury, it?s best to visit a chiropractor for a consultation right away. It went on to say that chiropractic care clinics like theirs specialize in treating whiplash injuries and will design a course of treatment after thoroughly examining the patient.

This progressive Marietta chiropractic clinic is also highly regarded by those that have taken advantage of their treatments. A testament to this is the fact that on some 432 reviews that have been left on their Google Maps listing, they average a remarkable 5 out of 5-stars. Among these reviews, Sentifica Wilson states, ?Great team, they work together, and make sure your needs are met. The staff makes sure you are comfortable, and they get you in and out. Mrs. Tami is normally greeting at the front desk. She is so high spirited with positive energy. She makes sure our treatments are ready by the time of arrival. She is just the sweetest. Then you have Dr. Valerie, easy to understand, she goes above and beyond to make sure her clients are being taken care of and making sure there is progress. Great Office!!? Taylor Latham added, ?I ?highly recommend? this place! They genuinely care about their patients and make you feel comfortable and at ease. The whole staff especially Tammy along with Dr. Adcock welcomes everyone with a warm and friendly smile and they are truly eager to treat your injuries.?

Dr. Adcock also mentioned that in addition to treating those suffering from car accident injuries, their reputable chiropractic facility also treats neck & back pain, slip & fall injuries, sports injuries, and work-related injuries that impact the musculoskeletal system and its surrounding soft tissues. For those who are interested in talking to this clinic about their chiropractic care after car accident or other specialty injury treatments, they can get in touch with them by phone, email, or by filling out the free injury consultation form on their website?s home page.
