

Banner Construction Emphasizes that James Hardie Siding Is Low Maintenance

July 15, 2020

July 15, 2020 -

Banner Construction, based in St. Louis, Missouri, wants to emphasizes that the James Hardie Siding has long term benefits that are hard to beat. In addition to being more durable than other sidings, it is also extremely low maintenance if properly installed, which explains why it is one of the more expensive siding options. The James Hardie fiber cement siding is the leader among fiber cement sidings and the most preferred brand by homeowners in the US. It is more than five times thicker than vinyl and it can resist warping and it is non-combustible. And James Hardie?s ColorPlus Technology ensures that the color will resist fading and maintain its beauty over a long period of time. Thus, its finish comes with a 15-year limited warranty for paint and labor, guaranteeing that there will be no peeling, chipping, or cracking during that period.

Jessica Benbow, Director of Marketing at Banner Construction, says ?We take great pride in being an Elite James Hardie Remodeler. This means our contractors specialize in the installation of James Hardie products. From siding to windows and doors, we consistently pursue high standards in workmanship and customer

satisfaction.?

She continues, ?We are proud to be St. Louis' premier Elite James Hardie Remodeler. We are certain that James Hardie Siding, with its low maintenance requirements, will surely satisfy homeowners.?

Being an Elite James Hardie Remodeler means that they have completed the James Hardie annual training program on general installation requirements, current best practices, and important quality requirements. It also means that they have been consistent in providing high quality results to the complete satisfaction of their customers. And lastly, it means that they specialize in the installation of a broad range of James Hardie product profiles and designs.

Banner Construction has been in the business of offering home exterior restoration and replacement service since 1993 to homes in St. Louis and St. Charles counties and neighboring cities. They are capable of providing services like premium replacement of doors and windows, fiber cement and vinyl siding replacement, and installation of low-maintenance PVC decks. Those who need to know more about Banner Construction may want to check out their website.

Jessica Benbow says, ?We don?t deal with ordinary - we only work with the best premium products. That means that our customers get results that are beautiful, long-lasting and require minimal maintenance.?

James Hardie happens to be the world leader when it comes to research and development regarding fiber cement siding. They have captured 90 percent of the fiber cement siding market in the United States and their siding has already been installed on more than 5.5 million homes.

Banner Construction also installs premium vinyl siding from Mastic Home Exteriors. The Quest® vinyl panel offers a classic wood appearance and it is available in 35 base colors and over 700 DreamColor® hues, which means that homeowners are likely to find a color that they truly prefer for their home. Mastic premium siding is capable of withstanding extreme weather while being eco-friendly. It also needs little maintenance.

They also offer premium doors and windows, particularly Pella and Simonton. Their Pella doors and windows are constructed from wood or fiberglass while their Simonton doors and window are made from vinyl. Homeowners may want to choose the Pella wood windows and patio doors if they want beauty, warmth, flexibility, and excellent energy efficiency. They can choose the Pella fiberglass doors and windows if they prefer high-performing and low-maintenance doors and windows with the ability to withstand high temperatures. Meanwhile, the Simonton vinyl windows can withstand all weather condition and they meet ENERGY STAR® standards and are thermal efficient.

Banner Construction can also install PVC decks made from TimberTech AZEK? Building Products. While

made from PVC, they offer the beauty of wood without the necessary upkeep and maintenance that wood products require. In addition, all Azek collections are scratch- and stain-resistant. And they are available in various colors and finishes with a 25-year limited warranty.

Those who are interested in home exterior restoration and replacement services may want to contact Banner Construction through their website, or call them on the phone, or contact them via email.
