Apex Pest Control Explains How to Find the Best Wasp Exterminator Close to Home

July 27, 2020

July 27, 2020 -
Apex Pest Control, a pest control services provider based in Sheffield, UK, has announced that they have recently published a blog post to explain how to find the best wasp exterminator close to one?s home. Wasps are a common pest during the summer because they tend to build their nests during the warm season. However, leaving the nests alone or do-it-yourself nest removal are not advisable because wasps can become aggressive when they perceive a threat to their territory. They can attack in swarms and each wasp can sting several times. And then there is the possibility that their venom can be fatal, although this is rare.

Tony Johnson, the owner of Apex Pest Control, says, ?Despite the endless DIY methods available to you, professional wasp removal and care are highly advisable. Wasps can be dangerous, which calls for a timely and safe solution. One of the many reasons to look for professional wasp nest care is that queen wasps create their home in hard-to-reach spots like lofts, attics, eaves or a wall cavity. You may not be able to reach without adequate types of equipment.?

He continues, ?Depending on the situation, location and the size of the nests, we take adequate actions. After injecting the pro-grade chemicals, the wasps will die. Hence, the nest will become harmless. Our trained technicians treat wasp nests without causing any trouble to you or your family.?

There are a number of reasons why the professional wasp control offered by Apex Pest Control is recommended. These include the fact that wasps create their nests in hard to reach areas; professional pest control technicians wear sufficient safety gear before approaching the wasps? nests; they inject a pro-grade chemical into the nest; the nest will die within two to four hours, although they will leave it for 48 hours for extra precaution.

Meanwhile, the cost of a wasp exterminator will depend on a number of factors, such as the location of the nest, method of removal, size of the nest, and the region where the home is located. Location plays an

important role in in the price of wasp control. For instance, in Yorkshire, the price ranges from 50 to 65 pounds sterling. For those living in Barnsley, the cost will be from 50 pounds sterling and for those in Leeds or Sheffield, the cost is from 65 pounds sterling. An additional cost will be charged if the nest has to be removed.

Apex Pest Control is also capable of taking care of other kinds of pests. These include feral pigeons, moles, bed bugs, fleas, rats, biscuit beetle, squirrels, carpet beetle, black ants, woodworm, cockroaches, honey bee, and mice. Their service areas are Rotherham, Barnsley, Sheffield, North Derbyshire, Doncaster, and Leeds.

It should be noted that there are a number of factors that make them stand out from the crowd. These include their 30 years of experience; the fact that they?re fully insured; their availability for 7 days a week; acceptance of credit and debit card payments; the fact that they are members of the National Pest Technicians Association (NPTA); the use of unmarked vehicles; and the fact that all of their operators and staff are B.P.C.A., R.S.H., LANTRA trained.

Apex Pest Control does not just offer pest control services to homes but also to businesses. For instance, they offer commercial pest control for rats and mice. For this service, they will first conduct a site inspection before they can offer a quote. Their site inspection will cover a number of places, such as common hiding places, outside premises, entry points, signs of rats, neighbouring buildings, and health issues.

Those who are interested in the Apex wasp nest removal services or other pest control services from Apex Pest Control may want to visit their website, or contact on the telephone or via email. They are open from 8:00 am to 8:00 pm, from Monday to Friday, from 8:00 am to 5:00 pm on Saturdays, and from 9:00 am to 5:00 pm on Sundays.
