

A Plumber in Seattle, WA is Highlighting New Strides in the Plumbing Industry

July 22, 2020

July 22, 2020 - PRESSADVANTAGE -

Seattle, Wash. ? Raymark Plumbing & Sewer is a local professional plumber in Seattle, WA. The company is highlighting exciting new advancements in the plumbing industry. Recently, the National Aeronautics Space Administration (NASA) announced that it is providing funding to small businesses for innovation research. Approved ideas are those aimed at creating technologies suitable for use on the moon and on Mars. As an added benefit, ideas proposed to help NASA projects often have uses on earth.

NASA depends on small businesses for innovative technology development and they are requesting ideas from plumbing and other industries. One example is a leak-proof plumbing fixture suitable for use in the moon?s extremely cold environment. Taking plumbing to the moon is exciting news for the plumbing industry.

NASA is hoping to provide \$51 million dollars to approximately 300 small business in 44 states to help develop technologies suitable for space exploration. There are currently six small businesses in Washington State whose proposals are funded through the NASA program.

As a small plumbing company, Raymark Plumbing & Sewer is excited that NASA will be extending this opportunity to small businesses around the nation, including its local Washington state community. As technologies continue to advance, the industry of plumbing is destined for continued growth. Raymark Plumbing & Sewer is dedicated to providing the best technological solutions to customers in and around the Seattle area.

Raymark Plumbing & Sewer offers full-service residential plumbing and sewer expertise, including drain cleaning, water heaters, sewer repair and replacement, 24-hour emergency services, and water leak repair in Seattle, WA.
