

TinyFrog Technologies Recognized as a Top WordPress Developer

July 29, 2020

July 29, 2020 - PRESSADVANTAGE -

TinyFrog Technologies, a San Diego web design agency, announced today that it has been recognized by TopDevelopers.co as one of the leading WordPress developers in 2020.

TopDevelopers.co's short list of outstanding WordPress specialists include only the most competent industry leaders. Assembled through extensive research, these prominent WordPress developers have achieved the highest level of customer satisfaction for both web design and responsive ongoing site management.

"We're thrilled to be honored as a top WordPress developer," said Mikel Bruce, CEO of TinyFrog Technologies. "With WordPress, we can deliver custom & flexibility development solutions that fit our clients' needs."

TinyFrog has been working exclusively with WordPress for over 10 years and has gathered a team of advanced developers and project managers with deep knowledge of the unique WordPress ecosystem. Additionally, TinyFrog specializes in WooCommerce e-commerce development and custom functionality from membership sites to custom plugins.

As the most popular content management system in the world, WordPress has garnered a lot of attention. It offers significant SEO benefits and customization options, thanks to the huge network of WordPress plugins. The user-friendly interface of WordPress also allows website owners to easily update the content on their own site.

However, WordPress can be extremely vulnerable to security issues if it is not built and maintained properly, so this is a vital part of their work. To protect every site that they build, TinyFrog offers WordPress maintenance & hosting service. Its team follows a strict 5-point protocol, which includes daily backups, monthly maintenance of plugins and themes, 24/7 monitoring, an SSL certificate and secure WordPress hosting on their specialized WordPress servers.
