

Andover Dentist Teeth Whitening Treatment for Private Hampshire Patients Launched

August 04, 2020

August 04, 2020 -

Dental Concepts Andover, a dental practice based in Andover, Hampshire, UK, has announced that they have recently launched their teeth whitening treatment for private patients. Teeth whitening is one of the many dental services that they provide. Teeth whitening is a simple and non-invasive dental treatment designed to whiten the teeth and improve a patient?s smile. Aside from cosmetic dentistry, they also offer general dentistry, restorative dentistry, preventative dentistry, orthodontics, face and beauty treatments, and treatments for nervous patients. More about the teeth whitening service can be gleaned at https://www.dental-concepts.com/teeth-whitening-andover-whitchurch-hampshire.

Dr. Manish Chitnis, Principal Dentist at Dental Concepts in Andover, says, ?Teeth whitening is a successful and simple method of lightening the colour of your teeth. The degree of whiteness achieved will vary from patient to patient and with the type of bleaching process chosen.?

He continues, ?There are a number of ways to whiten teeth. You?ve probably seen tons of over-the-counter

whitening products at your local medical store, from whitening toothpastes to rinses to whitening strips and other types of DIY at-home treatments. Please note, however, that teeth whitening carried out in beauty salons by untrained staff or staff without dental qualifications puts your oral health at risk and is also illegal. The single most effective and safe way to whiten teeth is with a professional teeth whitening session in your dentist?s practice.?

Meanwhile, the general dentistry services provided by Dental Concepts in Andover include but are not limited to: root canal, routine check-up, dental hygiene, oral surgery or extraction, and treatment for wisdom teeth. Root canal treatment is required when the blood or nerve supply of a tooth, known as the pulp, is infected due to injury or decay. Infection of the pulp may eventually result into an abscess and if root canal treatment is not performed, the infection will spread and the tooth will eventually have to be removed.

They also provide routine dental check-ups including oral prophylaxis. Oral prophylaxis or professional tooth cleaning is vital in keeping the teeth healthy. The process gets rid of food particles stuck in between the teeth, which can?t be done through the usual tooth brushing. They suggest that people undergo oral prophylaxis twice a year to keep the teeth healthy and avoid deterioration. Those who are interested in knowing their exact location and other important information can check out their Google Maps page at https://g.page/dentalconceptsandover.

The dental clinicians also provide extractions or oral surgery at Dental Concepts in Andover. For some people, a wisdom tooth may cause some pain or discomfort because there is not enough space for it and it pushes against the teeth that are already present. They will take an x-ray of the mouth to find out how the wisdom tooth is coming through, and then make a professional judgement on whether or not to take it out. Wisdom tooth extractions may be performed under sedation.

Meanwhile, many patients have expressed their satisfaction with the dental services they have received at Dental Concepts. For example, Mangesh G. gave them a five-star rating and said, ?Very professional and best in class service guaranteed. Well trained and lovely staff who are treating their patients with love and care. Great work!?

Michelle M. also gave them five stars and said, ?Dr Manish and his team at Dental Concepts have gone the extra mile to help me with my dental problems. All the staff have been friendly and efficient, but Dr Manish in particular, has displayed the quality skills of a surgeon with a kindness of heart that is rarely seen these days. A thorough examination awaits you in an immaculately clean and well presented, state of the art practice. Don't hesitate to ask for help when you need it.?

Those who would like to know more about the dental services offered at Dental Concepts Andover may want to check out their website at http://www.dental-concepts.com, or contact them on the phone or through email. They are open from Monday to Friday, from 10:00 am to 6:30 pm. Weekend appointments are available on an exceptional basis in some cases.
