

Business Basics Releases Security Stickers That Can Help Prevent Crime

September 04, 2015

September 04, 2015 - PRESSADVANTAGE -

Business Basics, based in Colorado, has launched a new line of security stickers. These stickers can help in keeping properties safe, as well as in saving money. They are suitable for domestic, commercial and industrial properties alike.

"Our surveillance sticker is perfect for homes and businesses," says Carlos Salguero from Business Basics. "Research has shown that these stickers can act as a real deterrent for burglars. This is because a burglar is always looking for the easiest property that they can get in and out of. If they find that it is under 24 hour surveillance, they will take no time in figuring out whether it is true or not. They will simply look elsewhere to find an easier target."

These business and home security stickers declare that a building is being monitored around the clock. And even if no such surveillance video is actually being used, the sticker can still act as a deterrent. As such, it can help to prevent robbery, which is where the money-saving element comes in. If a property is robbed, the financial cost of items that are taken and/or destroyed is usually very high, and the emotional cost of this cannot be expressed in monetary value. Added to that, people will need to pay higher home insurance

premiums, meaning they get punished for something they didn't do. Simply placing these stickers in various locations around the property can help prevent robbery.

Since its release, the video surveillance sticker has already received numerous positive reviews. "I really like these stickers a lot," says Just Me!. "I don't like to be home alone when my husband is away for work. This makes me feel a little more at ease knowing that if anyone decides to look at my house to break in they will see these stickers and hopefully think twice before doing it. They are really easy to put on. They are bright and clear and people can definitely see them when approaching the house. They stick with no problem at all and they don't come off easy."

Business Basics is committed to helping people feel safe in their own properties. Their research has shown that simply applying these stickers can go a long way towards achieving this.
