Pest Control Service Launched in Leeds, West Yorkshire, UK

August 17, 2020

August 17, 2020 -
Apex Environmental Leeds, a company based in Leeds, UK, has announced that they have recently launched a service for eradicating pests in Leeds, West Yorkshire, UK, and neighbouring areas. They want people in the area to know that they have a team of local pest eradication experts who are able to get rid of unwanted pests in an efficient, fast, and discrete service. They also want people to know that during the coronavirus lockdown, pest controllers are classed as ?key workers.? Thus, they continue to offer their services in spite of the pandemic and they can also provide a deep cleaning and disinfection service for a home or business.

Tom Johnson, a spokesperson for Apex Environmental Leeds, says, ?As a leading pest extermination service near you, we access every pest problem on an individual basis and give you an estimate of how much our service costs. Once your pest removal is finished, we will provide you with a report stating all the pest management and treatment we?ve done and advice on future pest prevention.?

The service areas covered by Apex Environmental Leeds includes not just Leeds but also Sheffield, Rotherham, and Barnsley. Their services are for domestic, commercial, and for agricultural and forestry. They can get rid of a variety of pests, including bed bugs, feral pigeons, moles, biscuit beetle, fleas, rats, black ants, squirrels, honey bee, carpet beetle, mice, cockroaches, wasps, and woodworm.

According to Tom Johnson, a number of factors make them stand out among the crowd. These include their over 30 years of experience; the fact that they are available seven days a week; the fact that they are fully insured; the fact that they accept credit and debit card payments; their membership in the National Pest Technicians Association (NPTA); the fact that their operators are BPCA, RSH, and Lantra trained; and their use of unmarked vehicles.

Apex Environmental Leeds is ready to provide their services to households, helping them get rid of pests,

such as insects and rodents. While they are not exactly a 24-hour emergency service, they do work seven days a week, including bank holidays except for Christmas, and they will do their best to solve the problem as fast as possible. The areas they cover for domestic services include: Rotherham, Doncaster, Sheffield, Leeds, North Derbyshire, and Barnsley.

They also provide pest eradication services for commercial establishments. This has become more and more important over the last decade because companies have become more aware of the problems that pests can bring to their business, from diseases to damages to the building and properties, including the negative effects on the business? reputation. As such, Apex Environmental Leeds provides a comprehensive service from insects and rodents, to bird control and building proofing.

Businesses can expect them to provide a free site visit to allow them to provide a report and quotation for the business. They will also make sure to provide the best possible operators and products. They will then perform regular visits to the business site to control and prevent pests. These activities will likely ensure that businesses will not have a pest problem, but if they do, Apex Environmental Leeds will come in to ensure that the problem will not get out of hand. Any emergency call-outs would be free of charge in case these are needed in between the scheduled site visits. Businesses will get a complete report after each visit and competitive pricing for the service is guaranteed.

They can also provide flexible solutions for agricultural and forestry requirements. They are capable of providing the pest eradication needs for all forestry species. They are also capable of working closely with estate owners, foresters, and farm managers. This allows them to help in preventing contamination, disease, and stock and crop damage. Their operators have been fully trained on how to deal will all of their client?s needs with their more than 30 years of experience enabling them to help clients with their crop assurance schemes.

Homeowners and other property owners in Leeds and surrounding areas who are interested in pest control may want to check out the Apex Environmental Leeds website, or contact them through the telephone or via email.
