Revitalize You MD Offers IV Therapy in Roswell, Georgia

August 13, 2020

August 13, 2020 - PRESSADVANTAGE -

Revitalize You MD, based in Roswell, GA, has announced that they are offering various intravenous (IV) infusion therapy options. IV therapy is a method for directly feeding vitamins, minerals and amino acids into the bloodstream to treat intracellular nutrient deficiencies. IV therapy is an effective and efficient way of rehydrating and feeding nutrients to the body. This is because it bypasses the gastrointestinal tract so that the cocktail of nutrients can go directly into the bloodstream and into the cells. If taken orally, the nutrients will require more time before they can get into the system.

They offer a variety of IV therapy solutions, which can be customized for the individual and specific circumstances. However, there are a number of popular IV cocktail options, which are the: hangover cure, Myers? cocktail, weight loss cocktail, and anti-aging cocktail. The hangover cure is suitable for anyone who wants to rehydrate fast. Thus, it is appropriate for those who had too much to drink and those who have worked out too hard.

The Myers? cocktail is suitable for people who are suffering from chronic conditions and have a number of symptoms, such as body inflammation, fatigue, asthma, muscle pain or weakness, and fibromyalgia. This particular cocktail may help in boosting the overall system of the patient.

The weight loss cocktail is for people who want to accelerate their progress in their medical weight loss journey. This is because when combined with their customized medical weight loss programs, this cocktail may aid in burning more fat and losing more weight in a safe and efficient manner.

And finally, the anti-aging cocktail is for people who want to feel and look young. This particular cocktail contains antioxidants such as glutathione that may support healthy aging and strong cognition, including coenzyme Q10, B complex, and vitamin C that may help to detoxify the body from free radicals that can cause damage to the body. The result is an improvement in the skin, hair, and nails. Those who would like to know more about Revitalize You MD may want to follow their Facebook page.

Rachael Clark, Director of Operations at Revitalize You MD, says, "Our mission is to improve the health span of our patients by addressing the chronic conditions associated with the aging process. Our certified and licensed staff brings a wealth of medical knowledge and experience to serve you!"

Revitalize You MD also offers hormone replacement therapy (HRT), which offers solutions for both men and women. While HRT is commonly known to be used by women who have reached menopause, there is a similar phase in men, which is known as the andropause. Andropause may gradually occur in men and may begin between the ages of 40 to 55, at which time they begin to experience a decline in their testosterone levels. In some instances, even men in the mid to late 30s can start to experience andropause. Symptoms of andropause include: increased fatigue, reduced strength and muscle mass, reduced energy levels, erectile dysfunction, lack of mental focus, low sex drive, and mental depression. These symptoms may be remedied through men?s testosterone therapy.

For women, HRT options may also be provided to counteract the common symptoms of hormonal imbalance that they start to experience during their late 30s and beyond. Usual symptoms of hormonal imbalance in women include: foggy memory, unexpected and excessive sweating (including night sweats and hot flashes), persistent weight gains, muscle loss, consistent and growing fatigue, lack of sexual desire, and vaginal dryness.

Customized medical weight loss programs are also offered at Revitalize You MD. They are adjusted based on the patient?s present situation and his or her health and lifestyle goals. Aside from individual services such as exercise programs, IV therapy, meal planning, health coaching, and their line of supplements, they offer customized package programs that provide greater value to their patients.

Those who are interested in learning more about the IV therapy solutions and other services offered at Revitalize You MD may want to check out their website, or contact them on the telephone, or through email. Those who want to know their location and other key information may want to check out their GMB listing. They are open from 9:00 am to 5:00 pm, from Monday to Friday.
