

Bored Panda Posts Underwater iPhone Photography Essay By Playtime Gadgets

September 08, 2015

September 08, 2015 - PRESSADVANTAGE -

Playtime Gadgets, a business in Austin, TX, has announced that their essay on underwater iPhone photography has been published on Bored Panda. The essay has been released to show people what can be achieved using their iPhones together with the waterproof case offered by Playtime Gadgets. They also want to highlight the Udemy Training, which is designed specifically for iPhone photography.

"The photographs shown on our essay published by Bored Panda show just what is possible using an iPhone underwater," says Daniel Hall from Playtime Gadgets. "Few people know that this is even possible. Put our waterproof iPhone case together with the Udemy Training course, and everybody can take pictures worthy of a professional exhibition!"

Playtime Gadget also wants to draw people's attention to tips on vacation photography. These tips include keeping the horizon straight, including people (or animals) in the photographs, and moving away from the standard posed photographs. It is also very important to make sure that people bring the right equipment with them in order to take these photographs, which includes underwater equipment.

Underwater cameras are quite expensive. Fortunately, the Playtime Gadgets waterproof case can be used on any smartphone, including the iPhone, effectively converting a regular camera into an underwater capable camera. Since its original release, the waterproof camera case has already received numerous positive reviews. "The Waterproof Smart Phone case is a wonderful item. I never considered using my phone in water before--who knew that was possible!" says Vicky McD. "But it is with this wetsuit for phones. The price is incredibly reasonable. I'm also impressed with the quick-reference guide and training video. I'm especially looking forward to taking it on my trip to Florida this fall. Fun product!

The underwater iPhoneography photo essay clearly demonstrates the type of photographs that an iPhone can take if it is kept waterproof. The underwater world is often experienced as slightly alien, because it is so inaccessible to regular human beings. The vivid colors are like nothing that is seen on dry land. Thanks to the waterproof case, some of this magical world can now be captured on photos.
