# How to Tighten a Loose Moen Single Handle Kitchen Faucet Base - New DIYwVCAP Article

*August 18, 2020*

August 18, 2020 -
Video Chat a Pro, a website that connects users with real-time help on at-home repairs and projects via livestream DIY video chats through smartphones, has announced a new blog post in their How to DIY with Video Chat a Pro resource center. The blog post, entitled How to Tighten a Loose Moen Single Handle Kitchen Faucet Base, guides readers through the process of fixing a loose Moen faucet basin as well as giving the step-by-step instructions of how to fix a loose Moen kitchen faucet handle. Readers in need of How Tos on either of these subjects can view the newest blog post by clicking here.

The How to Do it Yourself with Video Chat a Pro resource section, better known as DIYwVCAP, is a collection of How To articles on a variety of subjects. The fields covered by DIYwVCAP include plumbing, auto repair, electrical repair, HVAC maintenance, irrigation installation and appliance repair.

The most recent articles added to the DIYwVCAP section have also been in the DIY Plumbing category. Recent additions include How to Unclog a Bathtub and How to Dissolve Hair in a Shower Drain. Any readers with bathtub or shower drains that are clogged or slow-draining can get easy step-by-step instructions on how to solve their problems with household items by visiting the DIY Plumbing section here.

If the How Tos don?t solve the problem, Video Chat a Pro?s Livestream DIY Video Chat feature may be the solution. Without having to install a program or download an app, Video Chat a Pro allows users to connect directly with licensed tradesmen through their smartphones. From there, the professional plumber, mechanic, electrician, HVAC technician, landscaper or appliance repair specialist can assess the situation and give you advice based on years of experience and training.

?I like to think of Video Chat a Pro as anyone?s one-stop destination for any of your at-home installation, repair or DIY project needs,? the founder of Video Chat a Pro, Jason Bauder, said. ?We connect people with licensed tradesmen through their smartphone that can tell them exactly what they can do to fix the problem or

make their DIY project go easier, smoother and without a hitch.?

Video Chat a Pro also offers homeowners and car owners the ability to connect with local businesses in the auto repair, HVAC installation, repair & maintenance, appliance repair, plumbing, electrical repair, and irrigation installation fields and receive livestream video chat estimates. These estimates are also given in real-time through smartphones and allow homeowners and car owners to receive a precise quote at a significantly lower cost than an at-home visit or a trip in a tow truck.

Anyone that would like to use the Livestream DIY Video Chat feature or the Livestream In-Home Estimate feature can access them on Video Chat a Pro?s home page at www.videochatapro.com. For more information about Video Chat a Pro, their previous press release can be viewed here. For any questions or comments, the team at Video Chat a Pro can be reached by phone between 9:00am and 5:00pm, Monday to Friday at (512) 962-8780 or via email at info@videochatapro.com.
