

Company Specializing in Concrete Services in Gresham OR Announces the Launch of Their New Website

August 28, 2020

August 28, 2020 - PRESSADVANTAGE -

Gresham Concrete Services has just announced that they have launched their new website. They are a company that strives to be as progressive as possible and having an improved and more modern website keeps right in line with that philosophy. With them being a complete concrete services provider in the Gresham, Oregon area, the new website also better showcases the many different concrete solutions that they offer. The making of the newly launched website was a combined effort that included input from a professional design team, their staff, and even a few long-time customers. That resulted in a new website that is not only streamlined and visually appealing but also much more user friendly.

A spokesperson for the company says, "We are always looking at ways we can improve ourselves as a company. That's why when a few of the staff pointed out some of the shortcomings of our old website it didn't take long for everyone to get on board the effort to build a new and improved one. We outlined some key features that the new website had to have such as being easy to navigate around and not being overblown with photos and graphics and went to work. Needless to say, we are very happy with the new website the designers came up after using input from several different sources in the company. The customer feedback we are getting seems to indicate that we have achieved the goals we set out to accomplish with the new website and more."

According to the company spokesperson, other aspects of the new website that they feel their customers will be very happy with include the increased number of ways that customers can contact them. This includes having their phone number displayed on more web pages along with other contact information. There is even a new "quick callback form" on the bottom of the website's home page that customers can fill out. He added that the dropdown menus are also very easy to use and the text has been laid out in a much more simplistic and visually appealing way. It was noted that the information on the company's services written in the new website has also greatly improved. This includes some newer concrete services they have added that did not even get mentioned on the old website. The company spokesperson went on to say that they built much flexibility into the new website too in case they ever want to do such things as post informational blogs in the future.

The new website can be seen here at <https://greshamconcretecontractor.com/>.

According to the company spokesperson, they are making improvements in other areas of their company too. This includes new purchases of the latest and best equipment to do their core services such as their commercial and residential concrete work, all forms of concrete cutting, pouring concrete foundations & buildings, and their highly rated concrete curbing and patio services. He says that they now offer more decorative concrete and masonry services than ever before too. It was mentioned that these include concrete stamping, textured concrete flooring, and stone, brick, and concrete masonry block work. The company spokesperson also added that they are now being requested to do concrete coring work for their customers more often because very few contractors have the specialized training and equipment like they do to make this very difficult task proceed along smoothly. He says that their customers can expect them to keep adding more specialized concrete services each year because more and more customers are starting to realize that using concrete for projects offers value, durability, low maintenance, and its surface stays cooler than other materials even on the hottest of days.

The company spokesperson says that they provide many standard and decorative concrete services to a wide number of Gresham area cities and communities. He says that this includes Portland, Oregon City, Lake Oswego, West Linn, and Tualatin. For more information on this reputable Gresham, Oregon concrete contractors services, they can easily be reached by phone, email, or by filling out the contact form on the homepage of the newly launched website.
