

Concrete Services Company in Waterbury CT Launches Their New Website

August 28, 2020

August 28, 2020 - PRESSADVANTAGE -

Waterbury Concrete Services is pleased to announce the launch of their new website. This website will be a significant improvement for their customers over the old one which they felt had become outdated. The newly launched website is designed to make it easier for their customers to quickly get to the information on the specific concrete services that they are interested in. It also now includes information on all of the many new concrete services that the company has added over the last few years.

The company spokesperson says, "We are very excited when it comes to the launch of our new website. It was designed using a lot of input from our staff and we even asked some of our customers how we could improve upon our old website. The result has been a new website that is simplistic in nature, not overblown with visuals, and presents the information contained in it on our services in a very concise manner. We really could not be happier with the way our newly launched website turned out and the feedback that we are getting from our customers so far indicates they like it too."

Among the many highlights of the new website include its streamlined dropdown menu, its more appealing format, and an easy to fill out contact form that has been added at the bottom of the homepage. The company spokesperson mentioned that the new website also does a better job covering their key services which are concrete cutting, commercial and residential concrete services, concrete buildings and foundations, and their ever-popular concrete patio and curbing work. The new website also adds some nice visuals on their decorative work such as their stamped concrete and chimney and fireplace masonry services. It even goes over how they at Waterbury Concrete Services can help people with their concrete core drilling requirements because they have the experience and equipment to make this tedious task go smoothly.

The new website can be seen here at <https://waterburyconcretecontractor.com/>.

According to the company spokesperson, the website is not the only aspect of the company that they have improved upon. They are also proud of the fact that they now offer over 20 specialized concrete and masonry services. He says that they have done this because people have started to realize the value, durability, ease

of maintenance, and cooler surface temperature that building with concrete offers.

The company spokesperson went on to say, "We are a progressive concrete services provider that is also very focused on providing exceptional customer service. Having a modern and well-designed website is all part of that. Our company is also proud to have been a top-tier concrete contracting service in Waterbury and the surrounding area for over 30 years now. We use that experience to deliver impressive standard and decorative concrete solutions. All of our work is guaranteed to look amazing, refined, and kept in line with our customers' visions. This holds true whether we are finishing concrete pool decks, patios, or driveways. We are always committed to doing whatever it takes to be the best all-around concrete services provider in West Central Connecticut." He also stated that those at the company enjoy working with concrete because of the versatility it offers as far as its number of uses. Few construction materials can be used to build a wide variety of features such as steps, retaining walls, driveways, and even residential floors. The company spokesperson says that the improvement in concrete staining and texturing has made using this material even more practical for homeowners and businesses than ever before. He also added that they are a concrete contractor that is happy to provide free inspections and estimates and their work is backed up by a complete customer satisfaction guarantee.

For those who would like more information on this Waterbury area concrete contractor, they can send them an email, call them, or visit the newly launched website.
