

Company Offering Concrete Services in Cape Coral FL Launches New Website

August 23, 2020

August 23, 2020 - PRESSADVANTAGE -

A concrete contractor providing services in Cape Coral, FL, has announced that they have recently launched their new website. They want people in Cape Coral and neighboring areas to know that they have experienced and skilled project managers who are ready to discuss their concrete requirements. They have adopted strict quality assurance rules to make sure that the concrete provided for the customer will be the best possible in terms of durability and smooth texture. They are capable of providing a full range of residential and commercial concrete services, including concrete curbing, patios, concrete cutting, and concrete foundations and buildings.

A representative for the concrete contractor company says, "Hire us to curb the appeal of your property in Cape Coral or to lay the foundation of your next real estate project. Our team is here ready for you and we are always willing to go the extra mile to cater to your concrete needs."

They offer several kinds of professional concrete services in Cape Coral. These include: commercial concrete projects; masonry works; concrete foundation laying; foundation inspection & repairs, concrete coring, concrete floors, concrete structures such as patios, driveways, pool decks, and stairs; concrete services such as paving, resurfacing, replacement, and pumping; decorative concrete; colored concrete; stamped concrete; driveway replacement; and retaining walls building.

The company representative continues, "You should always check that all workers that come into your house are licensed and insured. If any of those employees lacks proper insurance coverage, your homeowner's policy will be liable for that individual. Furthermore, in order to become licensed, a worker needs to pass a series of strict tests to prove that they know their job at expert level. More often than not a licensed contractor will provide you a better-quality service than a non-licensed one. Contact Cape Coral Concrete Services today to schedule an appointment with one of our concrete experts."

For commercial concrete services, they always focus on complying with the expectations of customers, by paying close attention to all details that can affect the end result. That is why they are committed to providing

personalized services that cater to the specific requirements of each client.

One of their key services is providing concrete pavers, which offer the advantage of being flexible and requiring low maintenance. In addition, concrete pavers have a higher load-bearing capability compared to poured concrete. Furthermore, allowance for the expansion and contraction of the concrete is provided for concrete pavers, which means that cracking can be avoided. And because of the mortarless joints between the concrete pavers, a good level of drainage can be provided.

Cape Coral Concrete Services also offers concrete slabs. These include garage slabs, hand trowel finish concrete slabs, broom finish concrete slabs, and decorative finish concrete slabs. They make sure that all concrete slab work that they provide is of the highest possible quality, by working closely with their material suppliers and concrete producer.

They can also offer assistance with regards to the design, construction and installation of stamped concrete. Concrete stamping is an innovative method that allows the use of concrete in such a way that it looks and feels like a different type of surface. Concrete can be used to mimic more expensive surfaces to an impressive degree of accuracy. It is also possible to add color to the concrete to make it appear as close as possible to the surface that is being copied. Concrete stamping has therefore gained popularity for sidewalks, pool decks, driveways, and more. Various patterns can be used, including: sandstone, slate, limestone cobblestone, and wood.

Cape Coral Concrete Services can also provide concrete patios, with high-quality workmanship. Concrete patios offer the advantage of being durable, having a capacity to bear large weights, and being cost-effective compared to wood patios. The design possibilities are also unlimited when compared to patios made of wood and other like materials.

Those who require concrete contractor services may want to check out the Cape Coral Concrete Services website at <https://concretecapecoral.com/>, or contact them through the telephone. They are available from Monday to Sunday, from 8:00 am to 8:00 pm.
