

# Samsung Galaxy Note20 Series Launched by Cambridge Electronics Incorporated

*September 02, 2020*

September 02, 2020 - PRESSADVANTAGE -

Cambridge Electronics Incorporated, a company based in Fort Saskatchewan, Alberta, Canada, is excited to announce their product launch for the Samsung Galaxy Note20 series through their store. The newly released Samsung Galaxy Note20 5G and Galaxy Note20 Ultra 5G feature a minimal design with a metal body with beautiful details and transcendent colors, the Corning Gorilla Glass Victus, and complemented with an S Pen.

Dan LHeureux, a spokesperson from Cambridge Electronics Incorporated, says, "The Galaxy Note20 5G and Galaxy Note20 Ultra 5G take power to the next level with cutting-edge technology, letting you master whatever you choose to do next. Pen precision meets PC power. With S Pen and Samsung Notes, the device is so responsive, it feels like you're using a real pen to jot notes and sketch ideas. Then save your notes across your Galaxy devices while on the go."

He adds, "Optimize your mobile gaming experience on-the-go. Get the best Galaxy mobile gaming experience in the palm of your hand. Intelligent battery and super fast charge. Intelligent power that learns how you work and play to optimize battery life. Plus, the super fast charging boosts your battery in just minutes (using the included charger and cable)."

The Galaxy Note20 5G has a 6.7" display while the Galaxy Note20 Ultra 5G has a 6.9" display. With a simple tap of the S Pen, the user's handwriting can correct itself even when writing at an angle, allowing the notes to be legible and organized. It can also convert the handwriting into text that can be imported into Word or PowerPoint. The notes can be shared across mobile, tablet, and the PC. More information about these smartphones can be gleaned from the Samsung Galaxy SuperStore at Cambridge Electronics Incorporated.

Cambridge Electronics Incorporated has staff that can help their customers select the best mobile and data plans based on their specific requirements. From the latest smartphones, data plans and accessories, they

allow their customers to make various combinations of mobile devices and data plans, depending on their preferences. With the addition of the Samsung Galaxy Note20 series, their choices have been further expanded.

And as pointed out on their website, Cambridge Electronics Incorporated has a team of approximately a dozen Telus specialists, professional problem solvers, tinkerers and more. They work around the clock to offer the best products in the market as well as non-paralleled customer service.

Meanwhile, Dan LHeureux adds, "Experience the power of our world-class network. Our PureFibre network has all the moves. You'll stay connected, entertained and secure now, and in the future. Based on national average, our network is ranked #1 by PCMag as Canada's fastest major internet provider. Cambridge offers products that leads the market with our 100% fibre optic network which provides download speeds up to 1,500 Mbps and upload speeds up to 940 Mbps - so you can stream, download and video chat quickly and smoothly."

With the PureFibre network, they intend to connect Canadians to build stronger communities and provide help to those who need it the most. They offer a network that offers home internet, Optik TV, and SmartHome Security. And as the social restrictions due to the pandemic start to ease, they now offer a range of installation alternatives that are based on customers' needs and comfort level.

There is the Self Install option where the products are shipped to the customer with installation instructions. In the Virtual Install option, a technician will do everything that needs to be done outside of the home and then leave sanitized devices at the customer's door. Then they will make a video call to customers to guide them through installation of the devices inside the home. In the Professional Install, once it has been deemed to be safe, after installing the things that have to be installed outside of the home, the technician may enter the home to complete the installation.

Those who want to know more about the Samsung Galaxy Note20 series product launch and the products offered at the Cambridge Electronics Incorporated store may look for more information on their website, or contact them on the phone, or through email.
