

Boerne Tree Service Provides Emergency Tree Service to Help Homeowners During the Hurricane Season

September 04, 2020

BOERNE, TX - September 04, 2020 - PRESSADVANTAGE -

Central Texas Tree Service, a tree service based in Boerne, Texas, has announced that they are offering emergency tree service for homeowners in Boerne, Spring Branch, and Fair Oaks Ranch, Texas. This is in view of the state of Texas already in the hurricane season, where hurricanes are capable of damaging or toppling trees. Especially for trees that may have been weakened by some kind of disease or pest, such trees can be brought down or some of their branches can get broken by a hurricane. If the tree or branches are blocking a driveway or have fallen on a part of the home or electric power lines, homeowners would want to have them removed as soon as possible.

Lawson Eddy, owner of Central Texas Tree Service and a third-generation arborist, says, "Due to our team's many years of experience, excellent equipment, and genuine care for customers' interests, we will provide the best quality job that money can buy - at a very reasonable price. We offer all types of tree services, including but not limited to trimming, cutting, pruning, fertilization and removal in Boerne, Fair Oaks Ranch, Spring Branch, San Antonio and surrounding areas in Texas."

Many of those who have experienced the service provided by Central Texas Tree Service have left highly positive reviews. For instance, Michael C. gave them a five-star rating and said, "You cannot do better than Lawson and his crew. We had storm damage to several large trees and he came and gave a bid, then worked an off day to take care of us. Great service and very professional."

Meanwhile, Russ B. also gave them a five-star rating and said, "Great service. I am very pleased with the professional job Lawson and his crew did. They cleaned up the job site. I highly recommend Central Texas Tree Service."

Lawson Eddy has been an arborist for more than 15 years and he believes on the hands-on approach. This means that customers will likely find him working alongside his team. And as part of their emergency tree service, they offer tree removal services for trees that have been weakened by disease or aging.

The removal of a large tree is a dangerous and often daunting task, complicated when it is close to other structures like a house or barn. That is why tree removal requires the services of a tree expert. The team at Central Texas Tree Service has already travelled to different parts of the United States and experienced removing some of the biggest and most dangerous trees. The company is insured to cover damage.

And for those who are planning to plant some trees in their yard, the experts at Central Texas Tree Service will be able to offer some tips on tree sales. These will include the best locations for the new trees, including suggestions on how to avoid planting trees under power lines and how far they should be from sidewalks.

Those who are looking for any kind of tree service in Boerne Texas and neighboring areas may want to check out the Central Texas Tree Service website, or contact them by telephone or via email.
