

Excellent Pest Control of Irvine Notice of Merger

August 25, 2020

August 25, 2020 - PRESSADVANTAGE -

Excellent Pest Control of Irvine has stated in a recent report that they will be merging with another local company. The other local company is a small, unnamed company that has 5 employees, brand new equipment, and 3 utility vans.

Excellent Pest Control of Irvine has offered pest control services to the Orange County area for well over a decade and plans to continue providing these services well into the future. The company has been looking to grow their service area in order to help as many people as they can with pest infestations for residential and commercial properties.

The president of the company thinks the merger will help grow the business. He said in an interview over the weekend, "Excellent Pest Control of Irvine has offered quality pest control services to Orange County for years. Our customers love our staff and results and we love helping our customers stay comfortable in their home and work environment. I want to grow this company to reach as many people as possible with the best treatments out there. This merger will help take the company to the next level, offering brand new equipment and 5 amazing new employees. We are excited to welcome the new team members and I know they will be great at battling any infestation they are faced with."

Pests and rodents have been on the rise in Orange County recently and are becoming harder and harder to treat every year. Professional services are becoming needed more than ever and this merger is going to help offer that. The company says they will be able to help almost twice as many people after the merger than they are currently servicing.

A representative of the company said in a recent report, "We are excited to announce that this merger will help better take care of our Orange County residents. No one should be uncomfortable in their own home or work environment. We hope to help double the people after the merger."

He then continued to inform us that, "Pests are becoming harder to treat because they are multiplying and spreading further and faster than ever before. They are becoming more immune to over the counter treatments which means professional services are the best option. Luckily our services are affordable and are custom built for each species of pest. This means our customers will get the most effective treatments in a timely manner."

When residents suspect they have a rodent or pest issue, they can contact Excellent Pest Control of Irvine for professional pest control services. They are open from 8 am to 6 pm on weekdays and from 8 am to 5 pm on Saturdays. They are closed on Sunday. Their superior customer service team can be reached by phone or on their website at <https://pestcontrol-irvine.com>.
