Arrowhead Clinic Chiropractor Atlanta Advises People Not to Let Whiplash Injuries Go Untreated

September 08, 2020

ATLANTA, GA - September 08, 2020 -
Arrowhead Clinic Chiropractor Atlanta, a chiropractic clinic in Atlanta, GA, has announced that they have recently published a blog post where they advise people not to let whiplash injuries go untreated. Whiplash is soft tissue injury that can affect the muscles, ligaments, tendons and other soft tissues of the neck. Whiplash is one of the most common injuries that may result from a motor vehicle accident. Oftentimes, this injury is simply dismissed as a minor injury and it is believed that it will go away eventually. However, untreated whiplash may cause many people to develop severe complications in the future. There is also the risk of permanent damage to the muscles and joints in the neck, resulting in a lifetime of chronic pain. Those who want to read the blog post can do so at https://www.arrowheadclinic.com/atlanta/dont-let-your-whiplash-go-untreated.

Dr. Summer Turner from the Arrowhead Clinic says, ?Sometimes the delayed onset of symptoms of whiplash is due to the adrenaline rush that occurs during an accident. Once several hours or even a few days have gone by, the victim will notice the signs of whiplash. Unless you are seen by a medical professional like a chiropractor, you will likely experience chronic pain because of an untreated whiplash injury.?

She continues, ?We have been treating whiplash victims for decades. Our chiropractors in Atlanta specialize in car accident injury treatment and have the skills and experience necessary to help you recover. There is nothing to lose by seeking the expert opinion of one of our chiropractors after a car accident, especially since we offer free consultations. When you come to the Arrowhead Clinic of Atlanta for your free consultation, you will have the opportunity to speak with the chiropractor and let them know about your accident.?

It has been observed that a whiplash injury may require a long time to heal. And the longer treatment is delayed, the higher the risk of the person developing debilitating effects. In addition, whiplash is one of the possible causes of neck pain and there is a chance of the person suffering from permanent damage to the muscles and joints of the neck, resulting in a lifetime of chronic pain.

There are a number of common signs of whiplash. These include difficulties in sleeping; stiffness of the neck and decreased range of motion; dizziness and vertigo; depression and anxiety; headaches and migraines; and tinnitus.

They want to point out getting the help of an experienced chiropractor is vital for whiplash recovery. The chiropractors at Arrowhead Clinic Chiropractor Atlanta have the experience and the skills to help patients recover from whiplash. After patients come for a free consultation, they will have a chance to speak with a chiropractor, who will further assess the patient?s injuries with an in-depth physical examination. After the examination, the chiropractor will develop a treatment that is specifically customized for the patient.

Arrowhead Clinic Chiropractor Atlanta offers a number of services. These include treatments for car / truck injuries, neck and back injuries, slips and falls, sports injuries, and workplace injuries. For neck and back injuries, the doctors at the Arrowhead Clinic will evaluate the patient?s spine as a whole. They may also provide some advice on required nutritional modifications, changes in posture and sleeping positions, stress management, and lifestyle goals.

The doctors at Arrowhead Clinic will determine those areas which are restricting movement and they will also assess how the patient walks, including overall posture and spinal alignment. In addition to a physical exam, they will also take a look at the patient?s past medical history. Furthermore, they may require some imaging tests, such as an MRI or x-ray, to assist them in making a diagnosis of the exact cause of the pain. Neck injuries and neck pain may be treated by applying spinal manipulation procedures, including the flexion-distraction technique, instrument-assisted manipulation, and specific spinal manipulation.

Those who would like to learn more about Arrowhead Clinic Chiropractor Atlanta may want to check out their website, or contact them on the phone or through email. They are open from 9:00 am to 7:00 pm, from Monday to Friday.
