

Greenwood Pest Control Announces New Merger Deal

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Greenwood Pest Control has been providing professional pest control services to Greenwood, Indiana for over twenty years. They offer a team of fifteen professional exterminators who have all been trained on how to treat and pest in the area. They have helped thousands of families and business owners the years with various residential and commercial pest infestations.

The company recently announced that they will be merging with another smaller pest control company that is also local to the area. The unnamed company is deciding to stay anonymous for right now but will be revealed when the merger contract is signed this weekend. The company has been growing like crazy lately and the president of Greenwood Pest Control says the merger is going to help boost the growth even further.

He recently said, "In this merger we will be receiving brand new pest control equipment, new utility vans that are prepped for pest control, and three new employees who all have prior experience in pest control services. The new equipment will help us more effectively take care of any pest infestation in the area. The vans will help us more reliably get to the infestation quicker. Finally, the new employees, who will be starting next week, will help us help more people than ever before. Altogether this merger will allow the company to help more families and business owners than ever before with any pest problem out there."

Johnson County has noticed a large increase in the number of pest infestation cases for both residential and commercial properties. A representative of Greenwood Pest Control said in a recent interview, "We have noticed a large increase of infestations in the area and we believe this is due to pests becoming more immune to every day treatments. We think that do it yourself methods and over the counter products don't work as well as they used to. They aren't nearly as effective as they once were because the pests are adapting to those treatments and becoming immune. This has led to pests being able to spread uncontrollably and has revealed how important it is to use professional pest control services when necessary."

When a pest problem is suspected in a home or business try giving Greenwood Pest Control a call today. They can be reached by phone or on their website at <https://greenwoodpestcontrol.com/>. They are open on weekdays from 8 a.m. to 5 p.m. and 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays.

The company offers three major types of services: custom treatments, routine checkups, and emergency responses. Their custom treatments are specifically designed for each species of pest to guarantee that each infestation is taken care of in the most efficient and effective way.

Routine checkups are great because their exterminators take the proper precautions to make sure a pest infestation never happens in the future. They also respond quickly to emergency calls regarding wild and distressed animals or wasps and bees.
