

New Exterminators at Grade A Pest Specialists of Westfield

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Grade A Pest Specialists of Westfield has provided Hamilton County with premium pest control solutions for going on thirty five years this Wednesday. They have helped thousands of people with various commercial and residential pest infestation problems over the years. Their services are highly rated and they have built a large group of loyal customers that swear by their services. They are known for being fast and reliable as well as being very friendly. Their team of exterminators are all professionally trained on how to treat any pest in the area. The team of ten pest technicians are happy to be able to help the community stay safe and clean.

Pest infestations have been on the rise recently and due to this Grade A Pest Specialists of Westfield has been very busy trying to keep up with the calls. To help with this the company has hired three new employees. The company welcomed Jesse Lyndham, Max Hardman, and Braxton Campbell to the team last week and they all seem excited to start helping the community next week.

The president of Grade A Pest Specialists of Westfield recently said, "We have been extremely busy recently so to help comfortably take care of every pest problem in the area, we decided to hire three new people. Please help me welcome Jesse, Max, and Braxton to the team. This will be Jesse's first job in pest control but he is a fast learner and is a problem solver at heart. Jesse has lived in the area his entire life and realized the spike in cases recently so he decided to join the fight to control the spread of pests. Max has been in pest control for over fifteen years and just moved to the area. So make sure to welcome him to both the community and the team. Max attended the Purdue Pesticides Program at Purdue University before he began his venture into the pest control industry. Braxton has been an exterminator for over ten years. He loves helping other people and has a lot of experience with treating every species of pest that is local to the area."

The company says that pest infestations are on the rise due to pests adapting to everyday treatments that the majority of the population uses. These treatments include DIY methods and over the counter products like

pest sprays or traps. The bugs are able to spread so much because they are virtually going untreated. Most people think these methods work, and although some of them fix the pests issue, they don't take care of the place the pests are coming from. This means that there is no future protection and the pests will keep coming back inside of the home or business.

Grade A Pest Specialists of Westfield is open from 9 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays. If Westfield residents think they have a pest problem, they should try giving them a call. Their exterminators would be glad to help. They can contact them by phone or go to their website at <http://pestcontrolwestfield.com/>.

An employee of the company said, "Pests spread like crazy. When you see one, there are surely hundreds hiding nearby. Infestations can spread over an entire property over night so if you think you have a pest problem call today and we can help you with our professional services."
