

# New Marion County Pest Control Company

*September 04, 2020*

September 04, 2020 - PRESSADVANTAGE -

Superb Termite & Pest Control Specialists has helped hundreds of families and business owners since they opened their doors last week. They have helped control pest infestations in both residential and commercial properties. Their services have been getting high ratings and a lot of people are saying they are the best in the field. Others are saying their services are fast and reliable. They offer three major pest control services which include custom treatments, routine checkups, and emergency responses.

Their custom treatments are very popular because they are already known to be the most efficient methods in the area for treating pests. Each treatment is custom built for each individual species of pest in the area. No treatment takes care of two different types of pests. Each one is strategically planned to take care of each pest in the more effective way possible.

Their routine checkups are also very popular because they make sure to prevent pest problems from ever happening in the first place. Their pest exterminators will examine the property and take all of the proper precautions to make sure that the pests don't have an entrance into the property. Finally, their emergency services are great for when people are faced with emergency or dangerous situations. These situations include wild or distressed animals or wasps and hornets.

The company opened because there has been an increase in the number of pest control infestations in the area. The president of the bank recently said, "We started this company because all of us realized that there is an increasing problem in the area and no one was taking the proper steps to fix it. We are here to control the spread of pests and make sure that no family or business owner has to deal with the stress of a pest infestation in their home or business. We believe that the rise in infestations is due to the pests becoming immune to everyday treatments like over the counter products and DIY methods. Since this is what most people use, pests are virtually spreading without being treated. Professional pest control is becoming the only option for getting rid of a pest problem in a property."

Superb Termite & Pest Control Specialists offer a free consultation when people contact them. If a local resident has a pest problem on their property, they should make sure to contact them by phone or go to their website at <http://termitecontrolindianapolis.net/>. They are open from 8 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays.

A representative of the company recently said, "Pests are hard to treat mainly because they spread and multiply so quickly. Usually people see only one pest and they assume that is the only one. In truth, there are most likely hundreds of other pests hiding around in the property. If you suspect a pest infestation, call us today."
