

# Top Bed Bug Control Specialists Announces Merger Plan

*September 04, 2020*

September 04, 2020 - PRESSADVANTAGE -

Top Bed Bug Control Specialists has been providing the highest tier pest control solutions to Fishers, Indiana residents for over fifteen years. The company has helped thousands of business and home owners over the years with a lot of great reviews to show for it. They have a lot of reviews saying that their services are fast and reliable while their team of exterminators are friendly and helpful. Their team, ten professional exterminators, have all been trained on how to treat every pest in Hamilton County.

The company has rapidly grown their service area and team over the years and plans on continuing this growth into the future. Recently, they announced that they are going into a merger agreement with another local pest control company. The president talked more about the merger in a recent update, "We believe that this merger is going to be great for the future of Top Bed Bug Control Specialists. When the merger papers are signed, we will receive brand new pest control equipment for every exterminator along with three new utility vans and two new employees. The new equipment will allow us to perform pest control more reliably while still keeping it the same price. The utility vans are already set up for pest control services so they will help the team better perform and get to the infestation in a timely manner. Lastly, I am excited to announce that we will be getting two new employees. They will start the Monday after the contract is signed. I met them yesterday and I think they will fit right in with the team. They are bright and have a lot of experience in pest control. I know they are going to be great help to the community."

The company offers three services that are all extremely popular among Hamilton County residents. The first service is their custom treatments. Each treatment is individually designed to control the specific pest it is meant for. There is no general treatment. The company says that by doing this they can ensure that each infestation is taken care of in the best possible way. This returns "the most efficient results and provides pest protection way into the future."

Their next service is their routine checkups. These checkups can be scheduled monthly, quarterly,

biannually, or annually. These checkups prevent pest infestations from ever even happening in the future. Their exterminators investigate the target property and take all of the precautions necessary to guarantee long lasting protection. Finally, their emergency response services are useful for when customers are met with dangerous circumstances. This might include encountering a wild or distressed animal or something like wasps or hornets.

The company is open from 8 a.m. to 6 p.m. on weekdays and from 9 a.m. to 5 p.m. on Saturdays. They are closed on Sundays. If someone is having problems with pests in their home try giving Top Bed Bug Control Specialists a call. Local residents can contact them by phone or go to their website at [Bedbugcontrolfishers.com](http://Bedbugcontrolfishers.com). They offer free consultations and can answer any questions about infestations.
