

New Pest Control Services in Hamilton County

September 08, 2020

September 08, 2020 - PRESSADVANTAGE -

Bed Bug Treatments for Carmel, IN is the newest pest control company on the block. They just opened on Tuesday and have already helped over a hundred families and business owners. The company offers a wide variety of services and has a team of highly trained professional exterminators. Their team of sixteen exterminators all have years of pest control experience. They know how to treat any and every pest in the area.

Their services include custom treatments, routine checkups, and emergency responses. Their custom services are by far their most popular. Each treatment is custom built for each individual species of pest. The company says they don't offer generalized treatments and by doing this they are able to make the treatments more reliable and more reliable compared to competitors. These treatments achieve the best results for customers needing residential and commercial help.

Their next service, routine checkups, are also very popular. These checkups make sure that infestations don't occur in the future. Their team of exterminators will come to the target property and take all of the proper precautions to make sure that no pest has the ability to get in. Finally, their emergency responses are helpful for when customers are faced with a dangerous situation involving pests or animals. Examples of these are wasps and hornets.

The company recently noticed a huge increase in the number of pest infestations in the area. The reason for this is because the majority of Carmel residents use diy methods and over the counter products to try and control the infestations. Sadly, this doesn't work like it used to.

The president of Bed Bug Treatments for Carmel, IN said in a recent interview, "Pests have grown immune to over the counter products and DIY. Non-commercial grade pest sprays and traps don't work like they used to. Because of this, pests have been able to spread out of control. Professional help is needed to control the spread and is becoming the only option available when facing a pest problem."

Bed Bug Treatments for Carmel, IN is open from 9 a.m. to 6 p.m. on weekdays and from 10 a.m. to 2 p.m. on Saturdays. They remain closed on Sundays. People should contact a professional if they think they have a pest problem. They can be contacted by phone or on their website at <https://bedbugtreatmentsforcarmelin.business.site/>. A representative of the company once said, "Pests spread quickly so if you think you have a problem, contact us today and we can help you get rid of your pest problems."
