

Plan of Merger for Pest Control of Fort Worth

September 08, 2020

September 08, 2020 - PRESSADVANTAGE -

Pest Control of Fort Worth has been providing pest control to Fort Worth, Texas for over fifteen years. The company has helped thousands of families and business owners with a wide variety of pest infestations over the years. They provide reliable services for both residential and commercial properties. They have a team of ten exterminators who have all been professional trained on how to train every species of pest in the area.

The company just announced last week that they will be merging with another smaller company that is choosing to stay anonymous for right now. The merger states that Pest Control of Fort Worth will receive brand new utility vans and three new employees. The president of the company went on to talk more about the merger, "We are extremely excited to agree to this merger for the company. It is going to help boost the company's growth even more than it already has been. The new utility vans will be perfect for our team as soon as we fix them up for pest control. They will have 20% more storage than our current vans and 70% less miles on them. I am also excited to announce that we will be hiring three employees from the other company. They all have a lot of experience and training in pest control and know how to treat each pest in the area. They all have great work ethic and you can tell they really just want to help make the community a safer and cleaner place for everyone."

Pest Control of Fort Worth provides three major pest control services. Their first service is their custom treatments. These treatments are the most popular by customers and for good reason. Each treatment is individually designed for the specific pest it was built for. The company offers no generalized treatments. They say that this ensures the most effective results and guarantees a long lasting, pest free future for every customer.

Their routine checkups are the next service that they provide. These services are popular because they prevent pest infestations before they happen. When explaining each service the president of the company said, "We wait for a problem to happen when you can prevent it from ever happening in the first place. That is the beauty of these routine checkups." Their exterminators examine each property and take the actions to

make sure that pests have no chance of invading. Finally, their emergency responses are amazing for when people are met with dangerous situations. This might include coming in contact in wild and dangerous animals or wasps and hornets.

The company has a lot of great reviews for their services. If local residents have a pest problem they should try giving Pest Control of Fort Worth a try. Residents can contact them by phone or go to their website at <http://getpestcontrolfortworth.com/>. Their hours are from 8 a.m. to 5 p.m. on weekdays and from 9 a.m. to 12 p.m. on Saturdays. They are closed on Sundays. Pests spread quickly so people shouldn't hesitate to contact them immediately.
