

Merger Deal for Best Fountain Valley Pest Specialists

September 08, 2020

September 08, 2020 - PRESSADVANTAGE -

Best Fountain Valley Pest Specialists has been providing reliable pest control services to Orange County residents for over thirty years. The company has a wide range of pest control services which are all highly rated. They provide the community with a team of highly trained, professional exterminators who know how to treat every species of pest local to the area. Their services are known to be reliable and fast among the residents and business owners in Fountain Valley.

The company has grown tremendously over the years and plans on continuing this growth into the future. Their main goal is to provide the best pest solutions to the most people possible. Best Fountain Valley Pest Specialists recently announced that they will be merging with another smaller pest control company. The smaller company has decided to stay unnamed until the merger agreement contract is signed next weekend.

A representative of the company talked more about the merger, "We are constantly trying to find more ways to grow in order to help as many people as we can. When this opportunity was brought to me I was ecstatic. This merger is going to allow the company to help more residents than ever before. We will be receiving brand new pest control equipment and utility vans for the team as well as three new employees. The new equipment and vans will allow the team to perform pest control treatments faster and more reliably while the new employees will help us help more people than ever before. The new employees all have experience in pest control and know how to treat every species of pest in the area."

The company has noticed a major increase in the number of pest infestations in the area. They say the main reason for this is because the pests are adapting and becoming immune to everyday DIY methods. One of the company's exterminators said, "Pest infestations are on the rise because the pests are adapting to over the counter products. These treatments are becoming less reliable every year because of this. The pests are able to multiply and spread out of control because they are going virtually untreated. If people think they have a pest infestation they should call a professional immediately."

The company has a lot of high reviews for their treatments and a lot of people know them as being timely and reliable. If people have a pest problem they should give Best Fountain Valley Pest Specialists a try. The company can be reached by phone or on their website at <http://fountainvalleypestcontrol.net/>. They are open from 8:30 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays.

A representative of the company once said, "Pests are very hard to treat once they completely infest an entire property. Unfortunately, most of our local pests can take over an entire property overnight. If any local thinks they have a pest infestation they should call a professional exterminator right away."
