

NYC Liposuction Surgeon Offers eConsultations For Women Seeking Lipo360 And BBL Procedures

February 16, 2022

February 16, 2022 - PRESSADVANTAGE -

New York, NY based Kalsow Plastic Surgery is reaching out to the community to announce that they now offer eConsultations for women seeking Lipo360 and BBL procedures in NYC and Manhattan.

Sergei Kalsow MD of Kalsow Plastic Surgery clinic states, "The current situation with the COVID-19 pandemic has made it very difficult for prospective patients to schedule and attend consultations. Rather than making them wait until all of this is over, we have taken the initiative and begun to offer eConsultations for female clientele who are looking for Lipo360 and BBL procedures. These online consultations allow our clients to receive the professional advice and guidance that they need from the comfort and safety of their homes."

The Board Certified plastic surgeon in NYC adds that, through this initiative, they expect to inspire the community to stop postponing their procedures and instead set their plans in motion. According to the doctor, the clinic has taken every precaution necessary to ensure that the quality of these online consultations is as good as one could expect. This is why the requirements to apply for an eConsultation are so extensive ? patients need to provide previous medical records, various pictures of the area that will be affected by the procedure and so on.

"It is important to be thorough when submitting the form for an online consultation as our ability to provide the best consultations depends on the quality of the pictures and the details that you submit," states Dr. Kalsow. He adds that patients can expect a very similar experience to what they would receive during an in-person consultation.

He states, "You will be guided through how we can help you and how we would go about an operation. At the end of the session, you will have a clear understanding of what our cosmetic procedures encompass. We can help you feel more comfortable with your body, leaving behind all insecurities and uneasiness about your appearance. Our patients report higher self esteem and an increase in body confidence following their surgery."

Dr. Kalsow places a special emphasis on the clinic's online consultations for their Lipo360 and BBL surgeries as this is one of their most popular procedures (known to bear the best results). He states that they go over the plan with each patient in terms of where they would like the fat to be removed and possibly where to transfer the fat. Other details are also discussed, such as whether local or general anesthesia should be used. At the end of the session, the patient should have a clear idea and more thorough understanding of the procedure they wish to undertake. In turn, this will allow both them and their surgeon to make an educated decision regarding their procedure.

Through their YouTube channel, the Kalsow Plastic Surgery has published a video where they demonstrate a Lipo360 + BBL NYC time-lapse surgery. With this, they hope to inspire prospective clients to make a decision. Dr. Kalsow states, "It can be difficult to picture the before and after until you actually see it, so we hope that this video will alleviate some of our patient's doubts. The procedure shown in the video took around an hour and a half. Fat was removed and injected on the hips and buttocks. The result was a complete success, and our patient was remarkably happy with the surgery."

The Kalsow Plastic Surgery clinic offers various kinds of cosmetic procedures, including Breast Augmentations and Reductions, Rhinoplasty, Face Lifts, Hand Rejuvenation and Lip Augmentations, among several others. All of these services are carried out by the renowned Dr. Kaslow, who is known within the field as one of the most skilled plastic surgeons in New York.

The clinic's website offers more details on Kalsow Plastic Surgery and the different cosmetic procedures they offer. Interested parties may reach out to Sergei Kalsow, MD to follow up on any further inquiries as well.
