

## Revitalize You MD Encourages Community To Research Botox Procedures

*September 14, 2020*

September 14, 2020 - PRESSADVANTAGE -

Roswell, Georgia based Revitalize You MD is reaching out to the community to share information on their Botox procedures and what they encompass. They hope that this outreach will encourage people to research the procedure more and discover what it has to offer them.

Rachael Clark, a representative of Revitalize You MD, states, "While Botox is one of our most popular procedures, we have noticed that there are a worrying number of misconceptions and myths surrounding it. This is why we wanted to reach out and clear all doubts once and for all, helping you decide whether Botox is right for you. We will teach you everything that you need to know about the miracle injection that erases years of wrinkles after a single session."

Clark states that one of the most common misconceptions about Botox is that the procedure is not safe and could potentially be harmful for health. He explains, however, that modern Botox injections are completely safe, having undergone a series of processes to become the leading cosmetic injectable that they are today.

In fact, Botox services are regulated and are only administered by certified aestheticians who apply specified dosages to ensure that the body reacts accordingly with the toxin. This procedure is mostly painless and causes minimal discomfort, with a recovery time that spans no more than a couple of days. The result, of course, endures for much longer.

Another common misconception is that Botox toxins are addictive, though Clark reassures the community that Botox does not have such properties. In reality, there are no psychoactive ingredients involved in the making of this injectable. Clark says, "Botox is a protein specifically made for cosmetic and medical purposes. And while the amazing results from Botox can be addicting, the injectable itself does not cause any actual dependency or promote any addictive behavior."

Clark also explains that anyone can benefit from a Botox treatment, and the ideal patient can be anyone looking to reclaim the youth that they have loved. She says, "Time and age affect us all, and no amount of skin care can stop the fine lines, crow's feet and forehead lines from appearing. If you are someone who is tired of looking older than you actually are, and you understand the real benefits of Botox, then you are the ideal patient. We will work with you to devise a treatment plan that will help you achieve your goals and get your youthful look back."

Botox treatments can help mask some of the most common signs of aging in a patient's face, including Horizontal Forehead Lines, Frown Lines, Gummy Smile, Marionette Lines, Chin Lines and Square or Wide Jawline, among others. Being a premium Botox clinic in Roswell, Revitalize You MD is well known for producing outstanding results among their patients, and this has won them a distinguished reputation as one of the best cosmetic clinics in the area.

Revitalize You MD's patients have reached out through several platforms, including their Facebook page, to show their appreciation for the local clinic. In a recent Google review, Sarah Harris shares her experience with the clinic, saying, "I've done Botox treatments before, but no one has ever done it like Dr. Jonathan. He was very communicative and friendly throughout the session and even gave me advice on how to keep the results longer. Love Revitalize You MD!"

Another review, written by Joshua Peacock, states, "I've been going to Revitalize You MD for over a year now for testosterone hormone therapy and IV Vitamin Therapy. Their treatment and staff have turned my life around. I also have referred my girlfriend to them for Botox and lip fillers. Dr. Lucy does such a fabulous job with her. She's like an artist painting a masterpiece. This clinic is a part of my family with their professionalism and genuine, caring spirit."

The clinic's website offers more details on Revitalize You MD and their services. Interested parties may reach out to Rachael Clark to follow up on any further inquiries. Additionally they may also connect with the clinic through their official Instagram Page.
