

Belle Âme Med Spa Awarded Rights to Dispense Zo Skin Health Line of Products

September 17, 2020

September 17, 2020 -

Belle Âme Med Spa And CoolSculpting Center in Oklahoma City, OK, is pleased to announce that they have recently been granted a license by Zo Skin Health to dispense its line of skincare products in the Oklahoma City area. Unlike mass-market or store-bought products, Zo Skin Health is a line of professional skincare products which can only be sold through a physician's clinic, which is what the med spa has recently obtained the right to do.

Zo Skin Health is an Irvine, CA based company that formulates an array of clinical products for anti-aging, skin issues, acne and skin rejuvenation. The line was founded by Dr. Zein Obagi, a Board-Certified Dermatologist who has spent over 35 years in research and development of professional skincare product formulation.

Daniel James from Belle Âme Med Spa says, "We're very excited to start offering Zo Skin Health products here at Belle Âme. As a doctor and surgeon owned and managed med spa, we want to be known for the highest standard of treatment, bar none. Every medical spa carries a professional line of skincare, but we chose to represent ZO because it best lines up with our standards."

While, the Zo products are not cheap, the company purports that their line of skincare products is composed of science-based formulations that are uniquely effective and heavily backed by research. As would be expected for such a product line, the ingredients lists are impressive sounding. Some of these include Sodium DNA, and a proprietary complex of "biomimetic tetrapeptides" to "support the anchoring fibrils for dermal-epidermal junction integrity. While it may take a PHD to understand what most of that means, most patients will be satisfied with the recommendation from Belle Âme staff that the products are effective.

Belle Âme Med Spa is an Oklahoma City based clinic owned by Dr. Qualls Stevens, a local surgeon and provides professional skin rejuvenation treatments, anti-aging treatments, body contouring, and non-surgical fat reduction.

The medical spa offers a number of skin and face treatments. These include HydraFacial, photofacials, skin resurfacing, SkinPen, platelet rich plasma, Dermaplane, chemical peels, Botox, dermal fillers, lash lift, and ZO Skin Health products. For body and fat treatments they offer CoolSculpting, permanent hair removal, and Emsculpt & CoolTone.

ZO® provides preventative and results driven formulations for all types of skin for all ages and treats concerns with anti-aging, acne, redness, brightening, sensitive skin, photo damage protection, and hydration.

The clinic representative quoted above notes that many patients enjoy profound skin improvements with occasional HydraFacial treatments at the spa and then maintain their skin in between with Zo products at home. HydraFacial is a patented and unique treatment for cleansing, exfoliating, and hydrating the skin. It is a non-chemical, non-surgical, non-invasive and painless procedure with no downtime and side effects. It has been observed to provide visibly enhanced skin with no irritation and immediate results. Skin rejuvenation is provided through peptides, hyaluronic acid, and antioxidants.

Belle Âme also provides photofacial treatments, which are a highly effective method for skin resurfacing. It is a procedure for skin rejuvenation that makes use of intense pulse light. It is also known as photorejuvenation and one key advantage is that no abrasion is applied. It has been found to be able to address a number of skin concerns, such as sun damage, wrinkles, aging, spots, uneven skin tone, unwanted freckles, and texture.
