

Pest Control Company in Maricopa County

September 10, 2020

September 10, 2020 - PRESSADVANTAGE -

Pest infestations have been on the rise in Maricopa County recently. More and more people are becoming victims to pest infestations in their home or business. Fortunately, Tempe Rodent & Pest Specialists is a new pest control company providing the community with reliable pest control solutions. The company just opened their doors last Thursday and have already helped hundreds of families and business owners and have received a lot of high star reviews online. Their services are known to be reliable, fast, and safe.

The company offers three major pest control treatments that are already loved by local residents. Their first treatment, their custom treatments, are their most popular solution so far. Each treatment is designed by a veteran pest control expert for each individual pest it is meant to treat. No two treatments are alike and the company does not offer generalized treatments.

The president of the company explained why they do it this way, "By providing custom pest treatments instead of generalized pest treatments we are able to make our services more effective, affordable, and quick. This is what makes us stand out compared to all of the other pest control companies in the area. Each treatment is designed specifically for the pest it is meant to treat so that each pest is dealt with in a manner that is effective for that pest."

Their next pest treatments are their routine checkups. These are great because they prevent a pest infestation from ever happening in the first place. Pests spread quickly and can take over an entire property virtually overnight so it is a good idea to take preventative measures to make sure they can't invade. That is exactly what this service does. Their team of exterminators will go to the target property and examine it. They then will take all of the preventative steps to make sure the pests have no way onto the property in the future.

Finally, their emergency response service is great for when people are caught in a dangerous situation and need help. Their exterminators respond quickly to incoming calls and will get to the scene of the situation in a timely manner. They will then handle the situation in the safest way possible for everyone. These situations

might include dangerous animals or poisonous pests. It is never a good idea for people to try and take care of these animals or pests on their own. Always call a professional.

Tempe Rodent & Pest Specialists is already known to provide the most reliable and affordable pest services to Maricopa County. If anyone has a pest infestation in their property or needs any questions answered they can be reached by phone or on their website at <http://pestcontrol-tempe.net/>. Their hours are 8:30 a.m. to 5 p.m. on weekdays and from 8:30 to 12:30 on Saturdays. They are closed on Sundays.

An employee of the company explained, "Pests can spread across an entire property overnight. They multiply very quickly so if people think they have a slightest hint of a pest infestation on their property they should call a professional immediately. The longer the infestation is able to go on for, the harder and more expensive it will be to treat."
