

# New Pest Control Company

*September 10, 2020*

September 10, 2020 - PRESSADVANTAGE -

Pests have long been a problem for Maricopa County residents and business owners. They have continuously been a problem and have infested thousands of residential and commercial properties over the years. Luckily, Phoenix Pest & Rodent Specialists has been here for a long time controlling these infestations. The company has treated thousands of properties of the years because they believe no one should have the stress of a pest problem in their property.

The company has a team of exterminators who are all professionally trained on how to treat any species of pest in the area. Each exterminator is prepared for any infestation they might face. They offer a wide variety of services that are trusted as being the most reliable and affordable by local residents. Their most popular treatments are their custom treatments, routine checkups, and emergency responses. These treatments are what allow Phoenix Pest & Rodent Specialists to stand out from the other local pest control companies.

The company has grown like crazy over the years and they plan to grow even more into the future. They have more than doubled their service area and team of exterminators in the thirty years they have been providing pest services. The company is actively looking for new opportunities to help more people than ever before and luckily they might've just struck the perfect deal. They just announced last week that they are working on a merger deal with another smaller pest control company that would have been going out of business. The smaller company will now be a satellite company to Phoenix Pest & Rodent Specialists which will allow them to grow their service area and team size.

The president of the company talked a little bit about the merger, "We are constantly looking for ways to grow and help more people every year. We are working on a merger deal with another local pest control company that states that we will receive brand new pest control equipment, new utility vans, and most importantly, new employees. The smaller company will stay open but will be a satellite of us. They will also provide all of the services we do and will do just as good of a job as we do. By doing this, we will be able to provide reliable pest treatments to more people than ever before possible. It is an understatement to say that we are

extremely excited to partner with this company.?

Phoenix Pest & Rodent Specialists will have a team of twenty five exterminators who all have been professionally trained in pest control. Their services are fast, safe, and reliable. If people think they have a pest problem they should contact them by phone or on their website at <http://pestcontrol-phoenix.net/>. Their hours are 8 a.m. to 6 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays.

An employee of the company recently explained, "Most species of pests can take over an entire property in one night. It is good to take preventative measures to make sure they can't invade the property in the first place but if there is a pest infestation people should not hesitate to call a professional. We can take care of any pest infestation out there but the sooner we are able to treat it the quicker it will be taken care of and the cheaper it will be to fix."
